

## WP Update guide

---

In order to update the plugin via WordPress, please follow these steps:

1. Before updating, please backup your database or export your forms on the “Import / Export” page
2. Go to <http://codecanyon.net/downloads> and select “Installable WordPress files only”
3. Go to the “Update” page under the “ez Form Calculator” menu in your WordPress admin area
4. Click on “Choose file” and select the downloaded zip-file from step 1
5. Click on “Upload and update”
6. Click on “ez Form Calculator” to get to the main page. Press CTRL + F5 to clear the cache since an older file may be used instead of the updated one.

In order to update the plugin via FTP, please follow these steps:

1. If you can, please backup your database or export your forms on the “Import / Export” page
2. Upload the updated plugin to the relevant directory on your FTP server (usually at /wp-content/plugins/ez-form-calculator-premium/)
3. Go to the “Global Settings” page and check the option “Manual update”. Click on “Save afterwards”
