1. Getting Started

The GDPR (General Data Protection Regulation) is a set of instructions for companies that collect and process EU user data on the Internet. The new regulation is aimed at improving the level of protection and giving EU residents wide control over their data.

1.1. Installation

If you have web hosting and would like to install this plugin, using the WordPress Admin is the most straightforward option, as it handles the file transfer without you needing to leave the Web browser:

1. **Log into** your WordPress Admin panel.
2. Go to: **Plugins > Add New > Upload**.
3. Select the **stm-gdpr-compliance.zip** file.
4. **Click** Install Now. After clicking the link, you'll be asked to confirm this action.
5. **Click** Yes, and WordPress completes the installation.

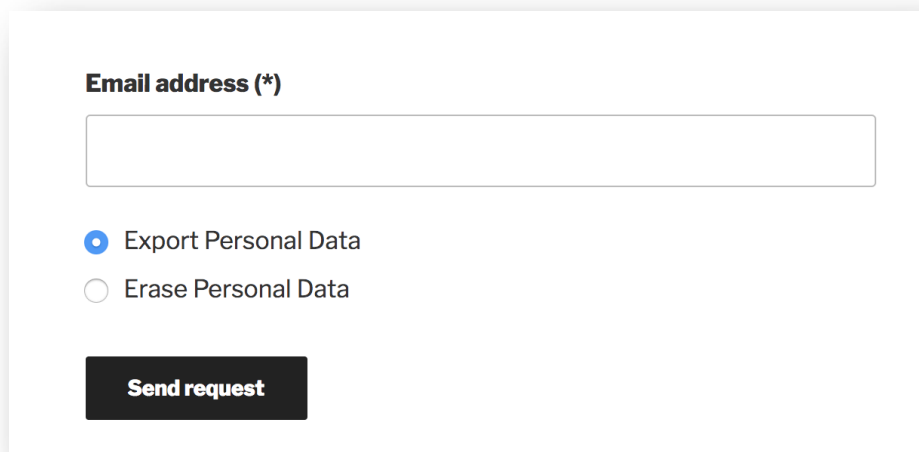

1.2. Shortcode

There is one main shortcode in order to create Data Access Request page:

Data Access and To be Forgotten form:

[stm-gdpr-data-access]

You need to create a new page via **Pages > Add new** and put this shortcode on your page in order to display Data Request form for your users:

A screenshot of a web form titled "Data Access Request". It features a text input field for "Email address (*)". Below the input field are two radio button options: "Export Personal Data" (which is selected) and "Erase Personal Data". At the bottom of the form is a black button with the text "Send request".
