JL Token Modules

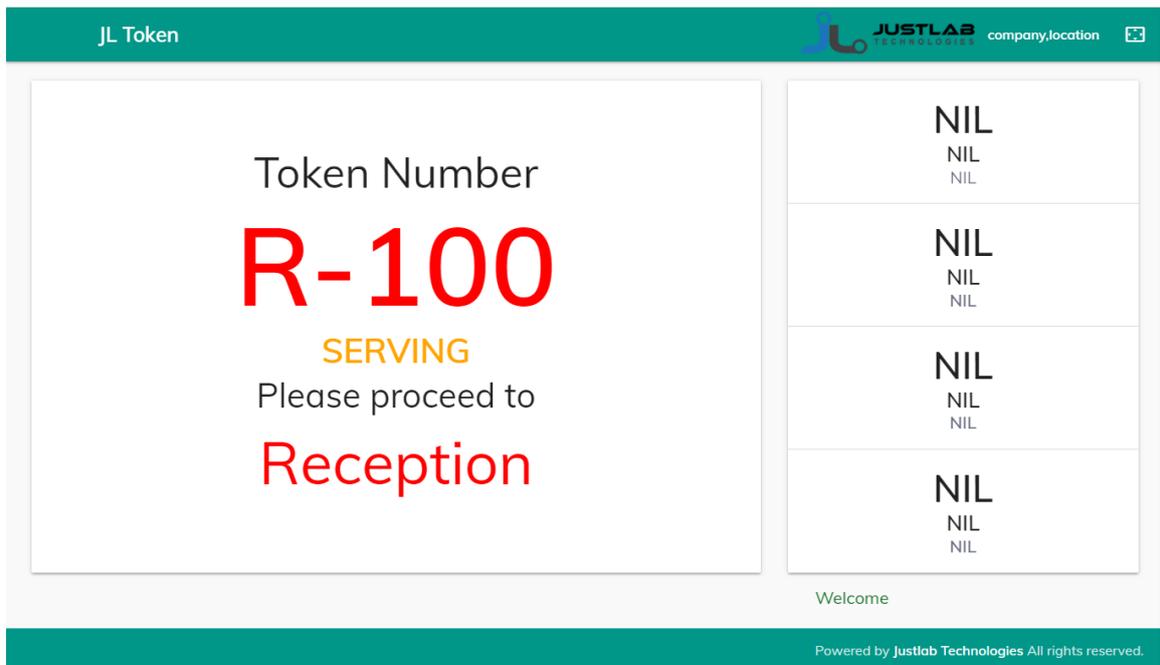

1) Dashboard

It will show overall details of the application

a) Display URL

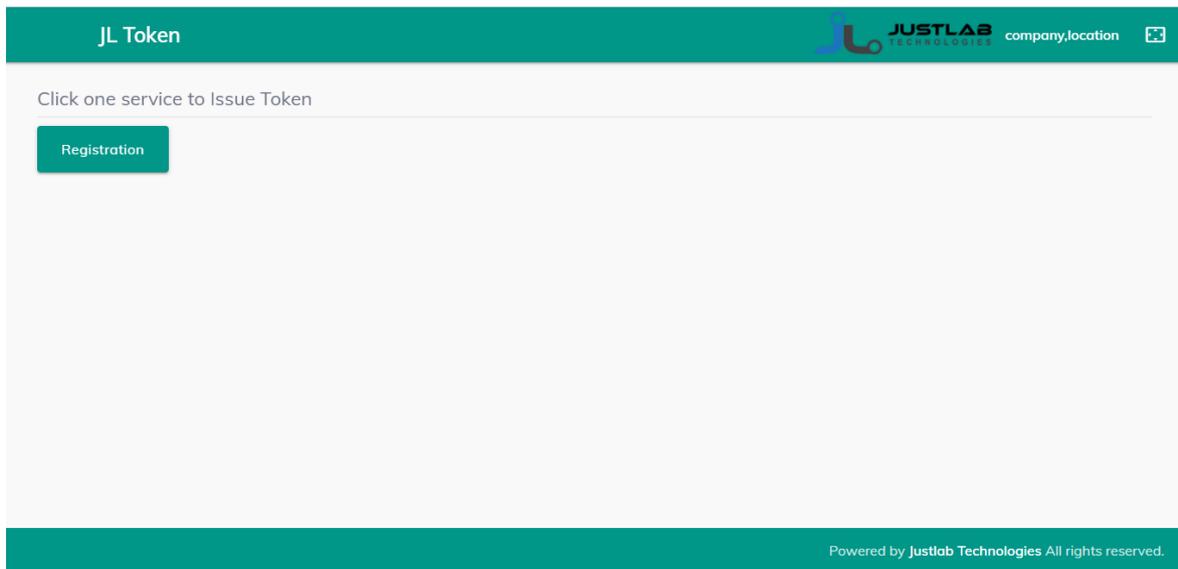

Display module can open from right top header

It is used to display for calling token numbers on wall mounted TV

b) KIOSK URL

Display module can open from right top he

It used to take a new token number

2) Service

Go to service from side menu

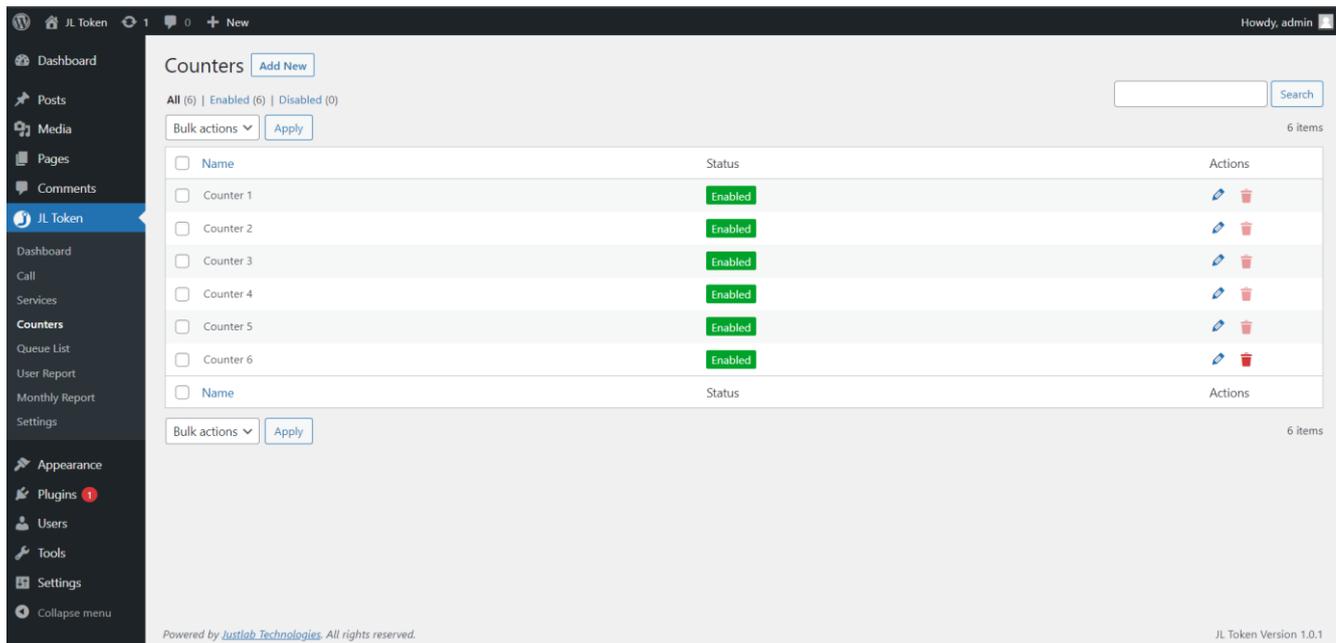

The screenshot shows the WordPress admin dashboard for the 'JL Token' plugin. The left sidebar menu is visible, with 'JL Token' selected. The main content area displays the 'Services' management page. At the top, there is a search bar and a 'Search' button. Below that, there is a table with 6 items. The table has columns for 'Name', 'Letter', 'Number', 'Status', and 'Actions'. The 'Status' column shows 'Enabled' for all services. The 'Actions' column contains icons for edit, delete, and print. The page also includes a 'Bulk actions' dropdown and an 'Apply' button.

<input type="checkbox"/>	Name ^	Letter	Number	Status	Actions
<input type="checkbox"/>	Service 1	S1	1	Enabled	
<input type="checkbox"/>	Service 2	S2	1	Enabled	
<input type="checkbox"/>	Service 3	S3	1	Enabled	
<input type="checkbox"/>	Service 4	S4	1	Enabled	
<input type="checkbox"/>	Service 5	S5	100	Enabled
