

Wallet System for WooCommerce | Wallet Integration System

WordPress WooCommerce Wallet System is an awesome plugin that allows customers to make the online payment from their Wallet. In WooCommerce Wallet plugin, the admin can manually debit or credit the amount into the customer's wallet.

The store owner can offer your customers a new convenient way of paying for goods and services. The wallet is an online prepaid account where one can stock money, to be used when required.

There is no chance of a decline in payment since the wallet is a prepaid account. As it is a pre-loaded facility, customers can buy a range of products without having to enter their debit/credit card details for every online transaction.

In this plugin, customers/users can use Wallet Cash during the checkout and the amount will deduct from their Wallet Cash. They can easily add credit to their wallet.

Features

WordPress WooCommerce Wallet System Plugin behaves as an online Payment Gateway.

It behaves as an online payment gateway so a buyer can purchase products from the store by using its available amount.

The customer can easily add credit to their wallet.

The process of adding credit to their wallet system is super easy for the customers of an online store. They simply need to enter the amount that they want to credit to their wallet system and checkout via available payment methods.

On the checkout page, a customer can choose to use wallet cash or any other payment method.

While placing an order, a buyer can choose whether he wants to use wallet cash for checkout or not.

The wallet amount can credit after the approval of an admin.

If a buyer uses a payment method like Direct Bank Transfer, or Check Payments, then the amount will credit after the approval of an admin.

Mail notification for wallet transactions.

A Customer will be notified via e-mail of all the wallet transactions.

Wallet Transaction List.

The admin can view the transactions made by the customers and also the transaction details like transaction id, reference, transaction type, amount, date etc.

Virtual Order Payment

The admin can also set the wallet configuration to accept payments for virtual order using the wallet.

New Features

Custom Wallet Amount Management.

The admin can manually Debit or Credit the amount into the customer's wallet.

Cashback Rules

The admin can set the minimum cart total, maximum cart total and the cashback amount which the customer will receive if the cart total lies in the range selected by admin.

Restrictions

Minimum Wallet Credit Amount can set by admin which means a customer has to credit at least this much amount in his/her wallet.

The admin can also set maximum wallet debit amount which means that the customer can use at most this much amount in a single transaction.

Multiple Cashback Conditions

If the admin has selected the multiple cashback conditions then the customer will get cashback applicable to both cart and product.

If the admin does not choose multiple cashback conditions then the customer can get cashback applicable to the cart or product, the preference of the cart or product can also be selected by admin.

Wallet Transfer

A customer can transfer his cashback amount to any registered customer.

Wallet Transaction List.

The admin can view the transactions made by the customers and also the transaction details like transaction id, reference, transaction type, amount, date, etc.

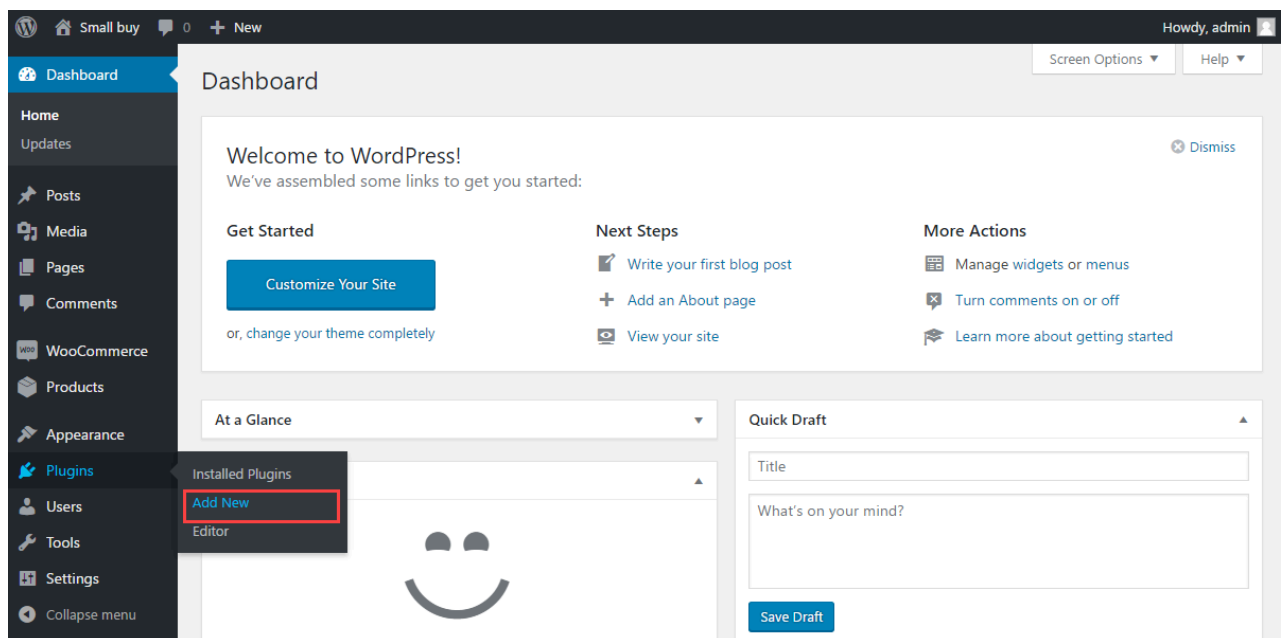

This module is compatible with WooCommerce's new High-Performance Order Storage (HPOS) feature.

If you require expert assistance or want to develop custom unique functionality, Hire WooCommerce Developers for your project

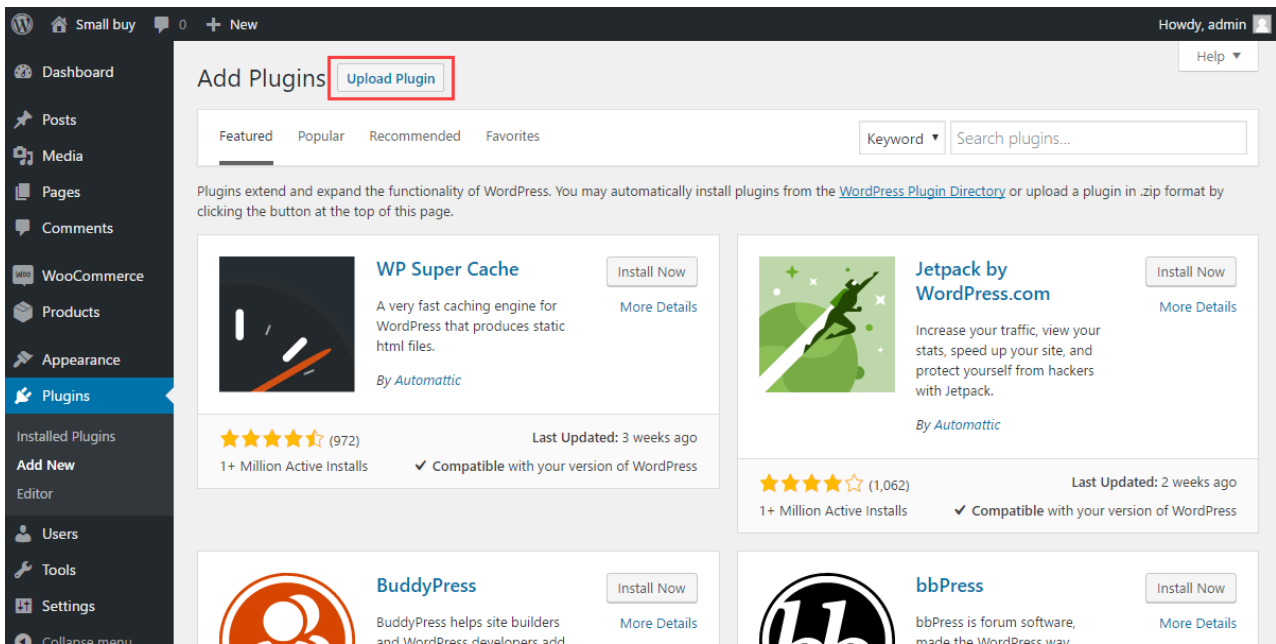

Installation

You will get a zip file after purchase. Upload it in the **“Add New”** menu option in the WordPress Admin Panel.

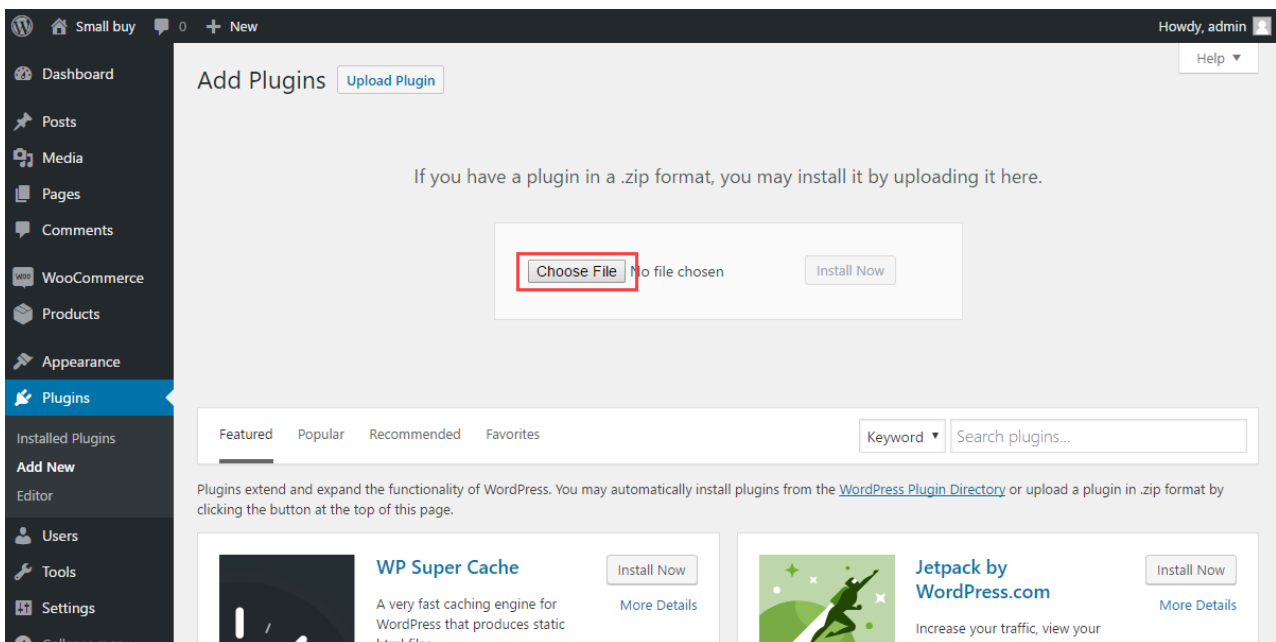

For this login to WordPress Admin Panel and Under the Dashboard hover your mouse over the **“Plugins”** menu option which brings out a Sub-Menu and then selects the **“Add New”** option.

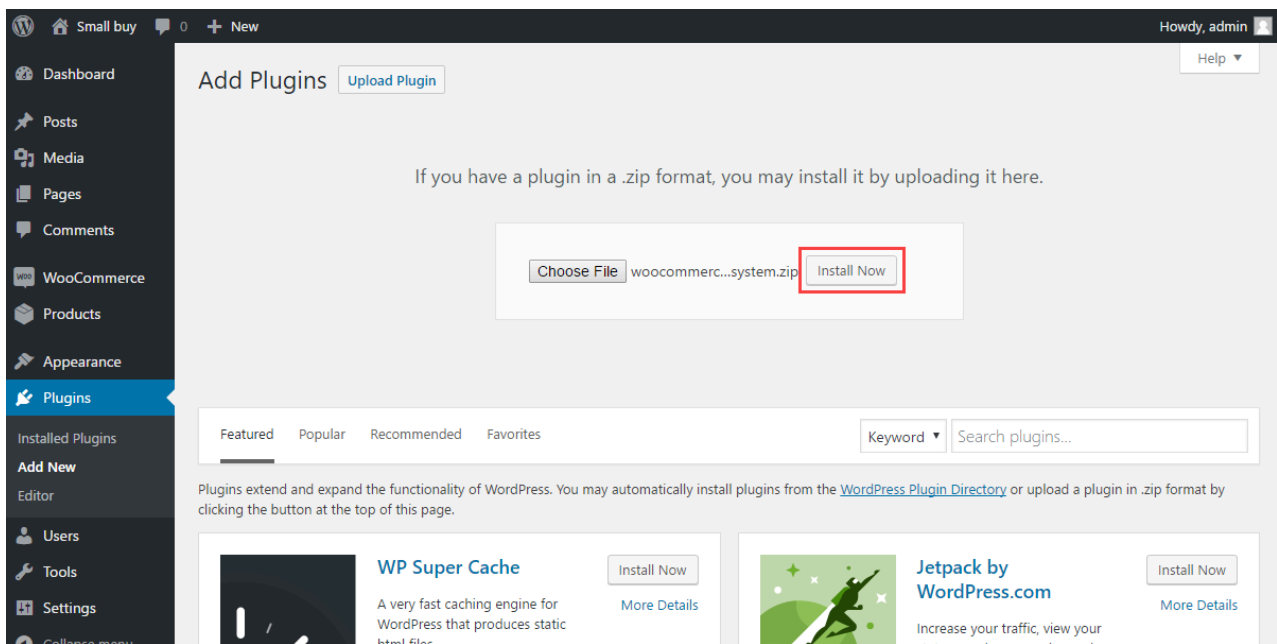

After this, you will see an option on the top of your page that is **“Upload Plugin”**, click the option to upload the zip file.

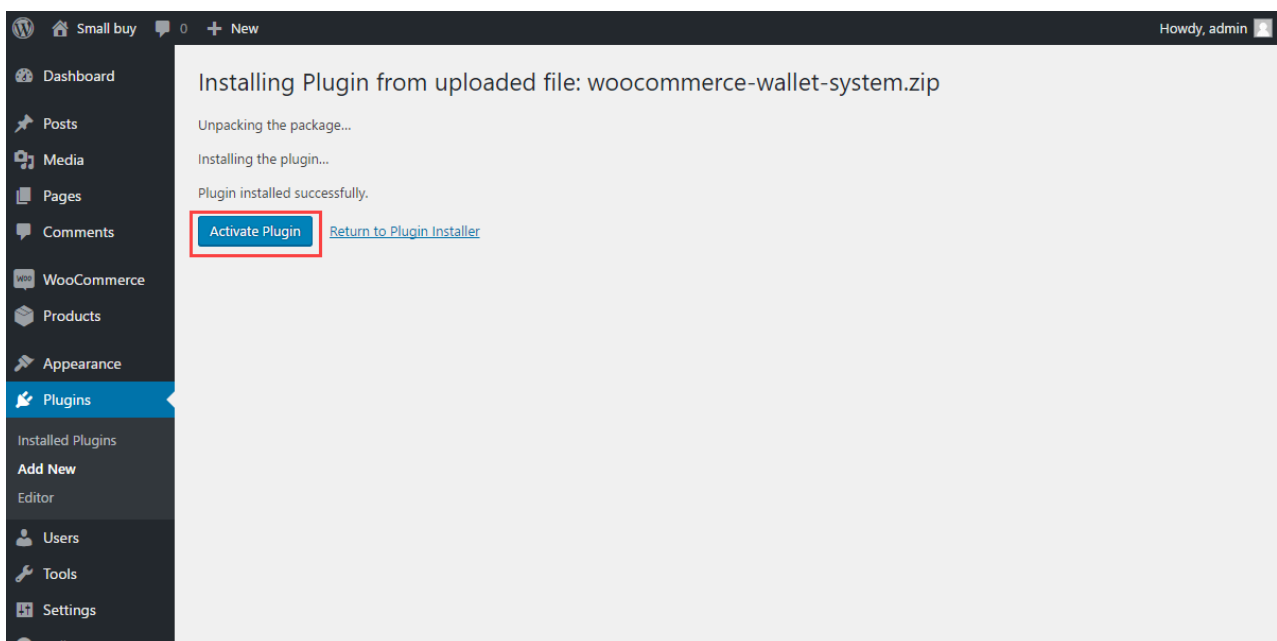

By clicking on the **“Upload Plugin”** option, below that you will see a button **“Choose File”** click on the button to browse for the zip file as per the snapshot below.

After browsing the file, click the **“Install Now”** button to install the plugin as per the snapshot.

Here when the plugin is installed correctly, you can see the success message and an option to activate the plugin. Click on “**Activate Plugin**” to activate the installed plugin.

Module Activation

Check how to activate your WooCommerce plugin through the purchase code.

Module Translation

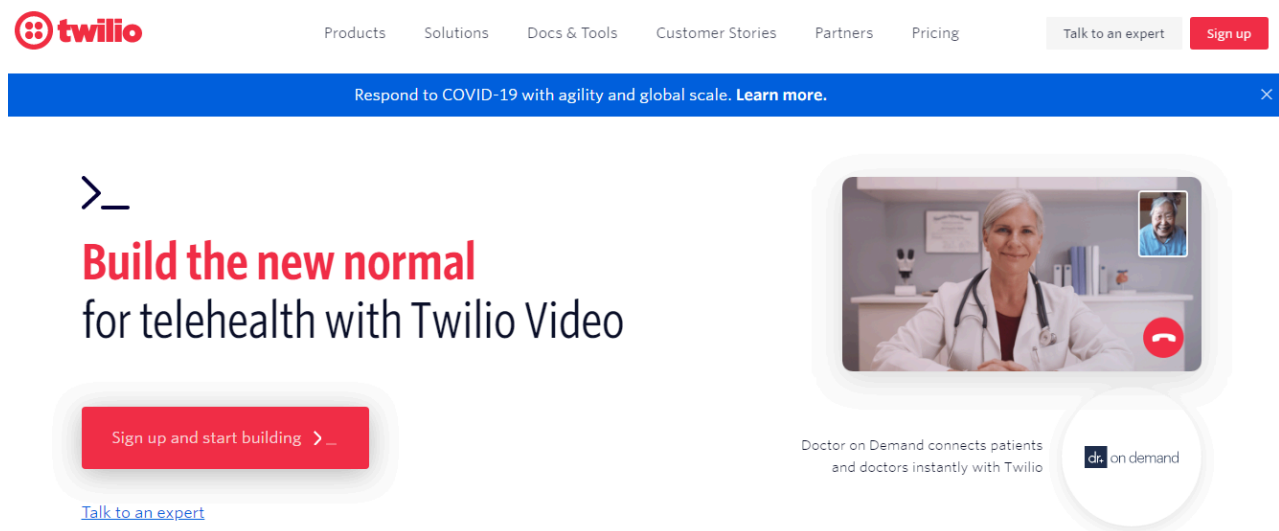

To know how to translate the module, you can click here.

How to Get the Test Twilio Credentials

The admin can get the **Account SID**, and **Auth Token** by following the below-mentioned steps:

Step 1:

First, Go to the web address <https://www.twilio.com/> and click on the signup button as shown below –

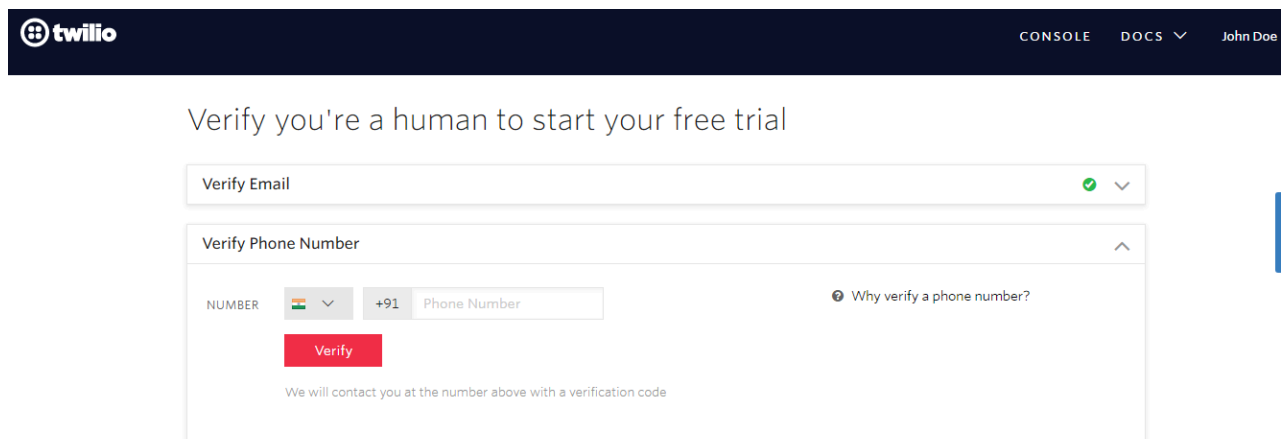

Step 2:

After clicking on the **sign-up** option, the below page will be open. Thereafter, the admin will enter all details to get registered.

The image shows the Twilio sign-up page. At the top right, there is a link 'Already have an account?' and a 'Login' button. In the center, there is a Twilio logo and the text 'Get started with a free Twilio account. No credit card required.' Below this is a form with two columns. The left column is titled 'WITH TWILIO YOU CAN BUILD:' and lists several features with green checkmarks: SMS marketing, Omnichannel contact center, Call tracking, Web chat, Push notifications, Alerts and notifications, and Phone verification. The right column contains input fields for 'First Name *', 'Last Name *', 'Email *', and 'Password (14+ Characters) *'. Below these fields is a checkbox with the text 'I accept the Twilio Terms of Service and have read the Twilio Privacy Statement'. At the bottom of the form is a red button that says 'Start your free trial'.

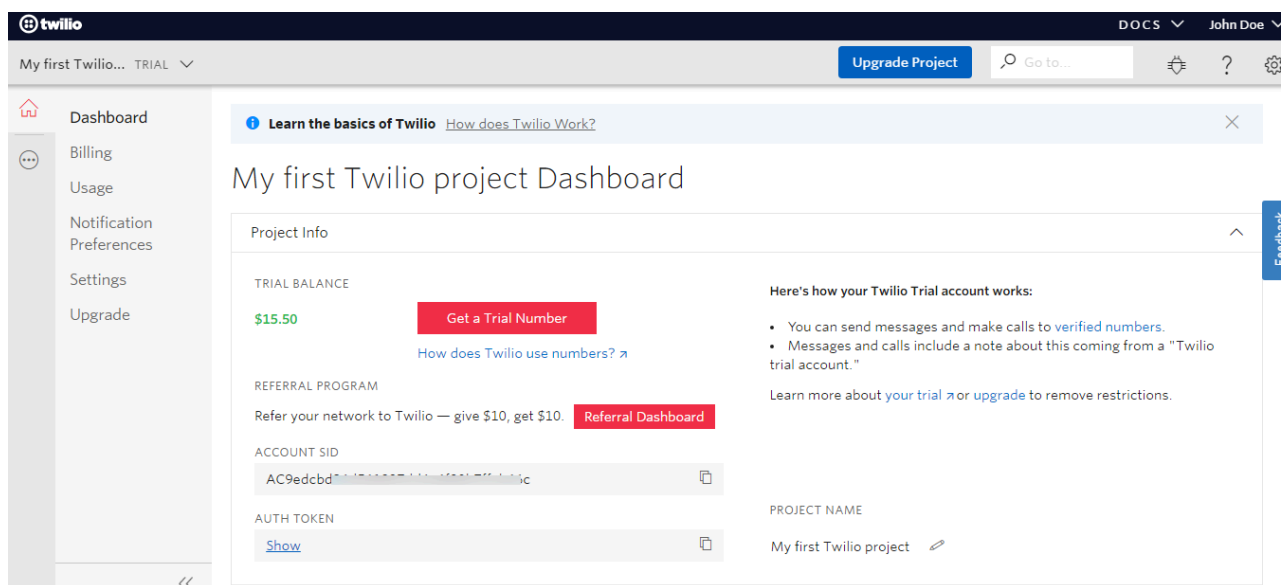

Step 3:

after clicking the **start** button above, you will have to verify your email address and then the phone number as shown below.

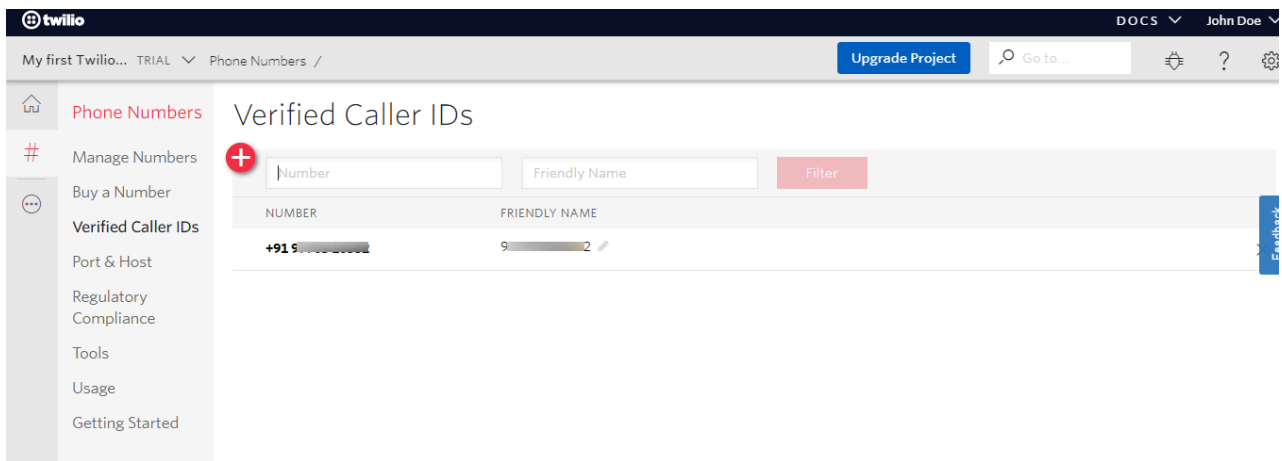

Step 4:

Further, post completing the above procedure click on the verify button, and after completing the required details the admin will get the **Account SID**, and **Auth Token** as shown below.

Step 5:

At last, to get SMS OTP user must need to verify his number as below:

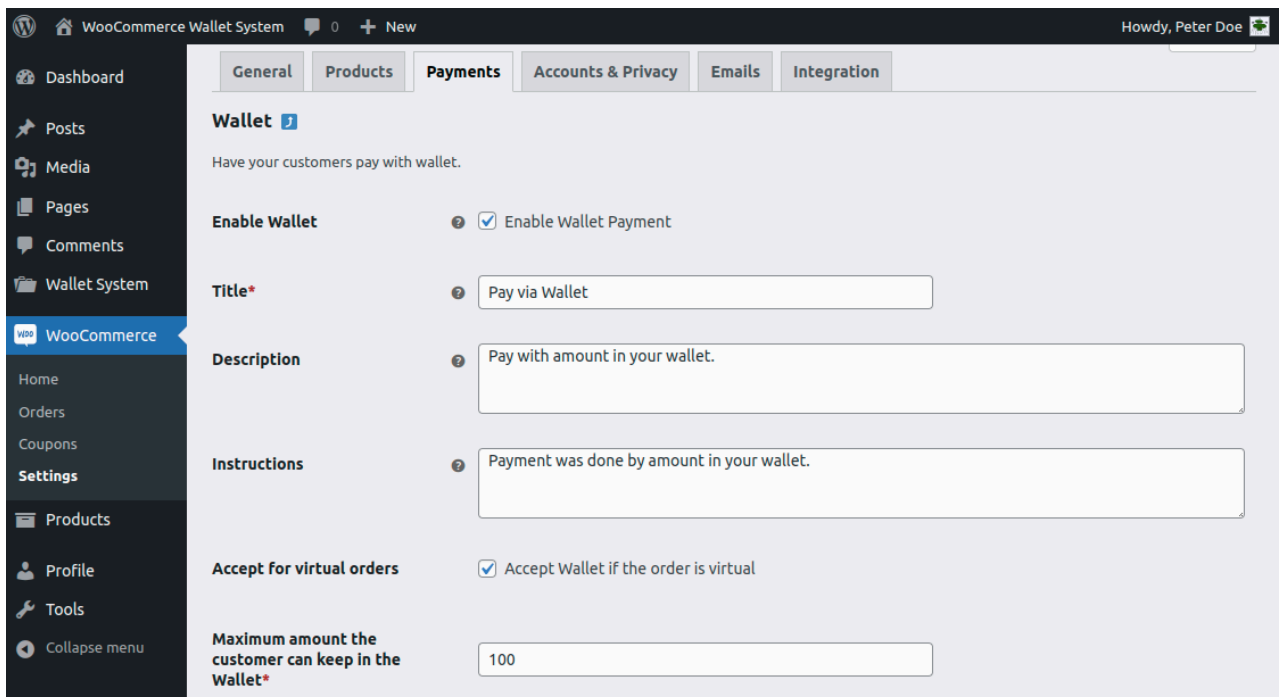

Module Configuration

After the successful installation of the WordPress WooCommerce Wallet System Plugin, the admin can configure this under “**WooCommerce > Settings > Payments > Wallet**”.

The admin can set some restrictions on wallet usage by customers.

- Enable the **wallet payment gateway**.
- Admin will enter the payment method **title** and **description** that the customer will see during checkout.
- Add **instructions** that will add to the thank you page.
- If the order is virtual then the admin can enable the **accept wallet**.
- Set the maximum amount that the customer can keep in the wallet.

- Admin can set **minimum** and **maximum wallet credit amount** which means that the customer can credit at least and maximum amount in his/her wallet.
- Set the **maximum amount transfer from the wallet**.
- Select the **maximum wallet debit type** i.e. fixed and percentage for wallet checkout.
- The admin can also set the **maximum wallet debit amount** which means that the customer can use at most this much amount in a single transaction.
- Enable **apply discount** option so that discount can apply on using the wallet payment option.

OTP Verification

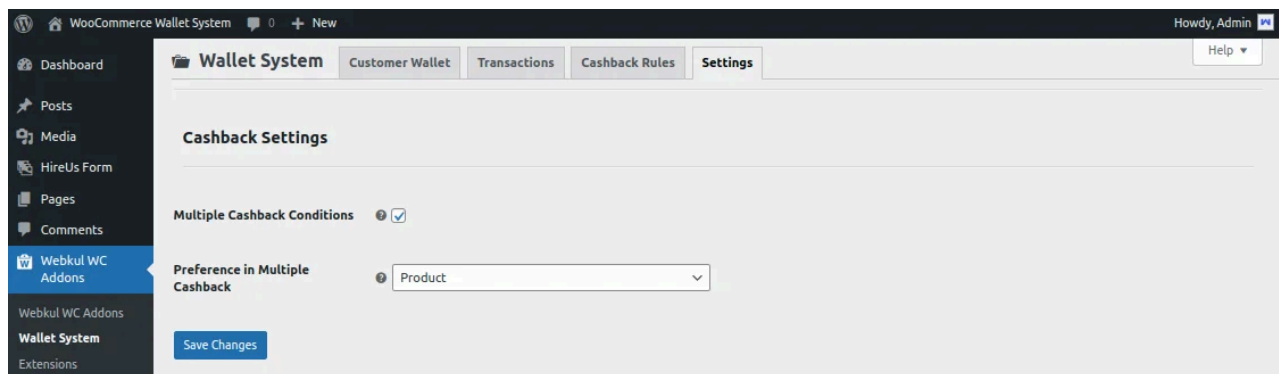

- The admin can also enable or disable the **OTP verification** for the customers.
- The admin can also select the **OTP access method** via **mail or SMS**, the customer will receive OTP.
- **OTP validation** limit can also be set by admin which means that the time limit allowed to the customer for applying the OTP.
- If SMS is enabled, then enter the **account SID** (Service Identifier) as a unique identifier for your Twilio account.
- If SMS is enabled, enter the **Twilio number** provided by Twilio that you can use to send and receive SMS and phone calls through the Twilio platform

- Enter the **auth Token** (Authentication Token) is a secret key associated with your Twilio account for the SMS OTP access method.

This OTP verification will be valid for wallet-to-wallet transactions.

Note: If the Admin selects SMS as the Access Method, he must install the Twilio package via the composer. The way to install Twilio via composer is:- composer requires Twilio/SDK.

Now, Click on Save Changes to save the restrictions on your wallet. Now, it acts as a **payment method**. **Enable** this to be used at **checkout time**.

Cashback Settings

The admin can apply cashback on the cart as well as the product.

- If the admin **disables multiple cashback conditions**, in this case, the customer will be able to avail of cashback applied to the product or cart.
- If admin **enables multiple cashback conditions** then the Customer can avail of the cashback applied to both products as well as the cart.
- The admin can set a preference for the cashback to be availed by the customer. If the admin **disables Multiple Cashback Conditions** and the **preference as Cart**, then the customer will be able to avail of the cashback which is applicable to the cart and if the **preference has been set as a product**, then the customer can avail the cashback which has been applied to a product.
- Click on the **save changes** button to save the changes as shown in the above screenshots.

Adding Wallet amount

After login, the **“My Wallet”** tab is available on the customer’s My Account page. From here a customer can easily manage the wallet.

Wallet

- Dashboard
- Orders
- Downloads
- Address
- Account details
- My Wallet
- Log out

The maximum recharge amount can be: £50.00. The total wallet amount limit is: £1,000.00.

Wallet Amount

£0.00 [Wallet Transfer](#)

£

Add to Wallet

Using Wallet System

A customer can use the wallet amount at checkout time. Have a look at the use of wallet amount at checkout time in different situations.

1. No wallet amount available :

If there is no wallet cash available then **“Pay via Wallet”** or **“Wallet”** are not available at checkout time. The buyer needs to pay for the order via other payment methods.

Filter

11 items

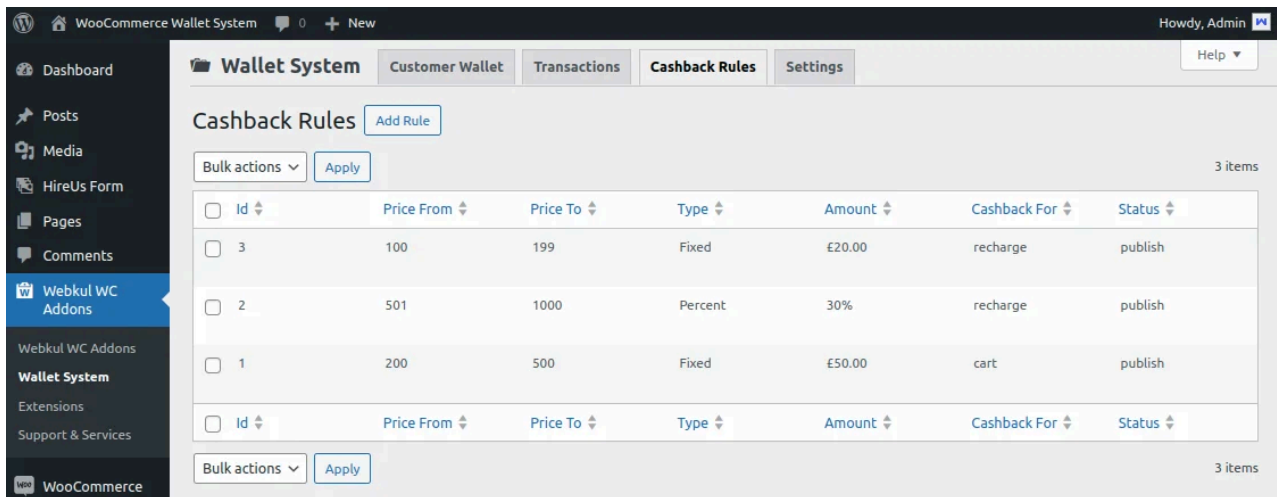

Transaction ID	Customer	Amount	Transaction Type	Date
#14	billydoe@webkul.in (#5)	£4,500.00	Debit	May 31, 2024, 9:54 am
#13	peterdoe@webkul.com (#3)	£35.00	Debit	May 27, 2024, 7:32 am
#12	peterdoe@webkul.com (#3)	£1.80	Debit	May 27, 2024, 7:31 am
#11	peterdoe@webkul.com (#3)	£5.50	Debit	May 27, 2024, 7:31 am
#10	peterdoe@webkul.com (#3)	£2.00	Debit	May 27, 2024, 7:27 am
#9	peterdoe@webkul.com (#3)	£3.50	Debit	May 27, 2024, 7:27 am
#8	billydoe@webkul.in (#5)	£5,000.00	Credit	May 27, 2024, 7:26 am
#7	peterdoe@webkul.com (#3)	£21.00	Credit	March 14, 2019, 1:21 pm
#6	peterdoe@webkul.com (#3)	£31.50	Credit	March 14, 2019, 1:20 pm
#5	peterdoe@webkul.com (#3)	£20.00	Credit	March 14, 2019, 1:20 pm
#4	peterdoe@webkul.com (#3)	£100.00	Credit	March 14, 2019, 1:16 pm
Transaction ID	Customer	Amount	Transaction Type	Date

The CSV file will look just like the image shown below:

	A	B	C	D	E	F	G	H	I	J
1	transaction	order_id	reference	sender_name	sender_email	customer_ref	customer_email	amount	transaction	date
2	1	96	Wallet Cashback base	-	-	admin@we	admin@we	£50	Credit	3/14/2019 13:08
3	2	98	Wallet Cashback base	-	-	admin@we	admin@we	£21	Credit	3/14/2019 13:12
4	3	99	Use Wallet	-	-	admin@we	admin@we	£18	Debit	3/14/2019 13:14
5	4	-	Manual Wallet Credit	webkul	test@webk	peterdoe	peterdoe@	£100	Credit	3/14/2019 13:16
6	5	100	Wallet Cashback base	-	-	peterdoe	peterdoe@	£20	Credit	3/14/2019 13:20
7	6	100	Wallet Cashback base	-	-	peterdoe	peterdoe@	£31.5	Credit	3/14/2019 13:20
8	7	101	Wallet Cashback base	-	-	peterdoe	peterdoe@	£21	Credit	3/14/2019 13:21
9										

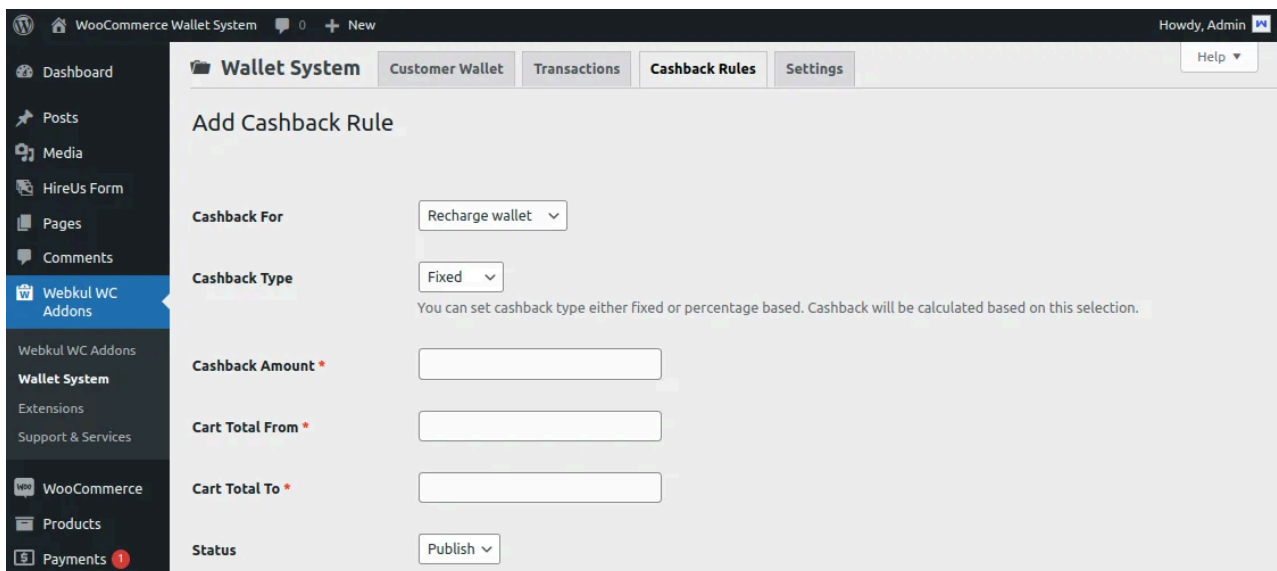

Cashback Rules

The admin can set cashback rules for the customers as per their requirements by navigating through **Customer Wallet >Cashback Rules**.

Under the **Cashback Rules** section, the admin **can add cashback rules** to the customer's wallet as shown in the below image.

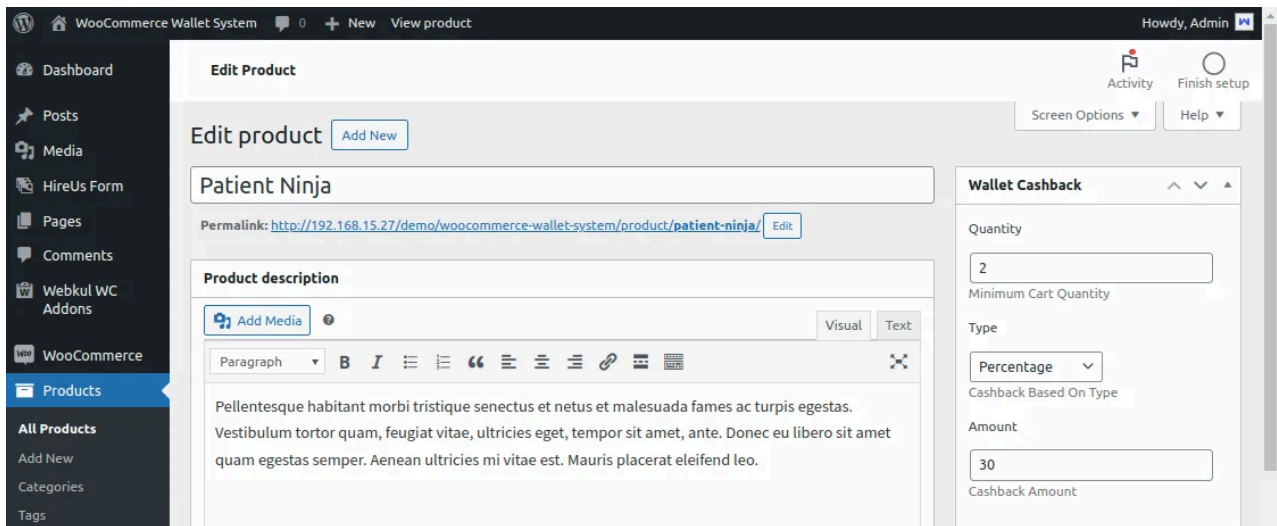

Click on the **save** button to add the cashback rule.

admin can select the **cashback for** – **recharge wallet** or **cashback**

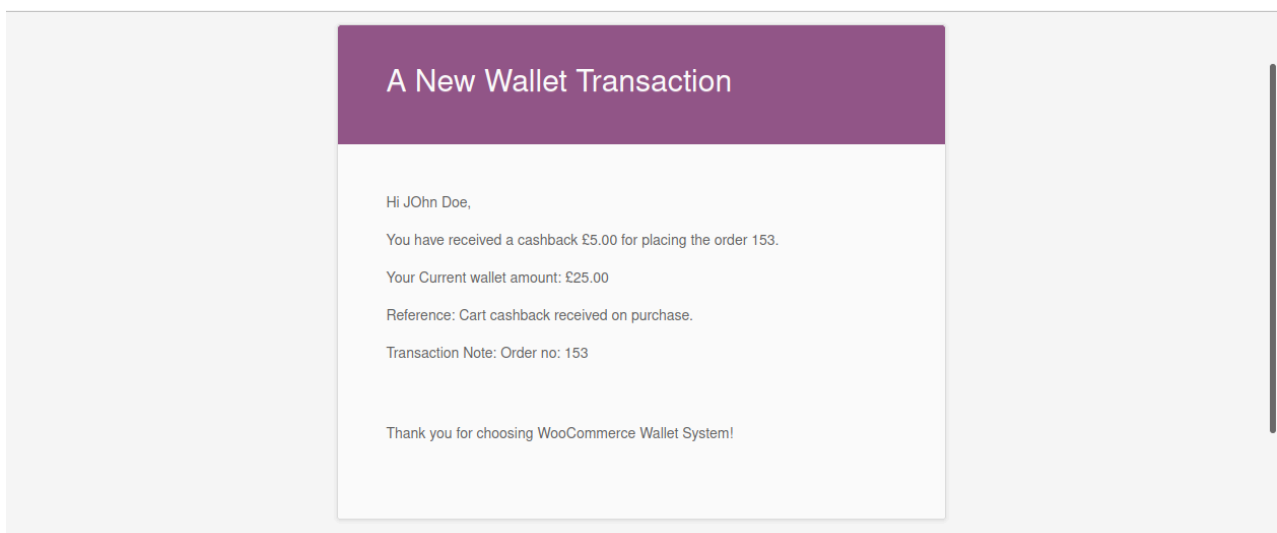

then set the **cashback type** as **fixed** or **percentage**. Also, the admin can set **minimum and maximum cart amounts** for the customers to avail of cashback. The admin can also set the cashback amount.

The admin can also apply cashback for a particular product.

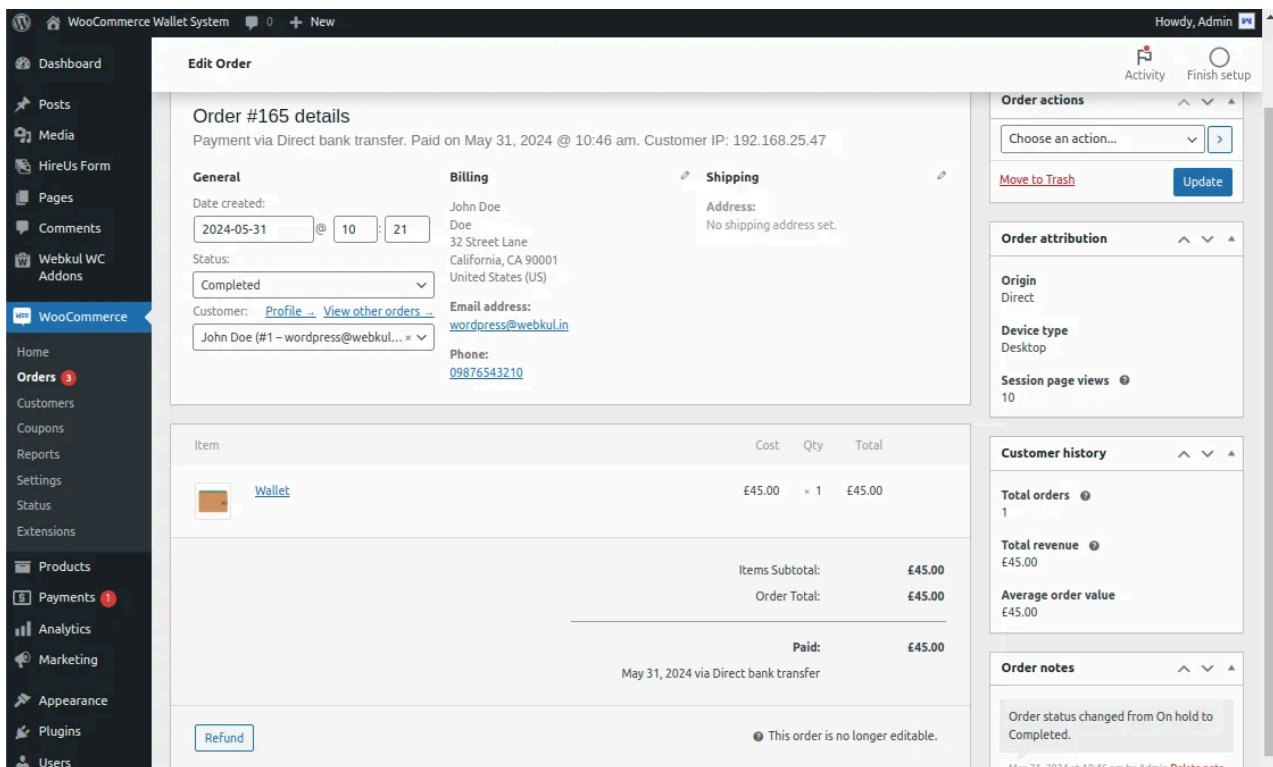

If the customer purchases the product and the product range lies between the amount set by the admin.

Then customers can avail of the cashback and get email notifications on the registered email.

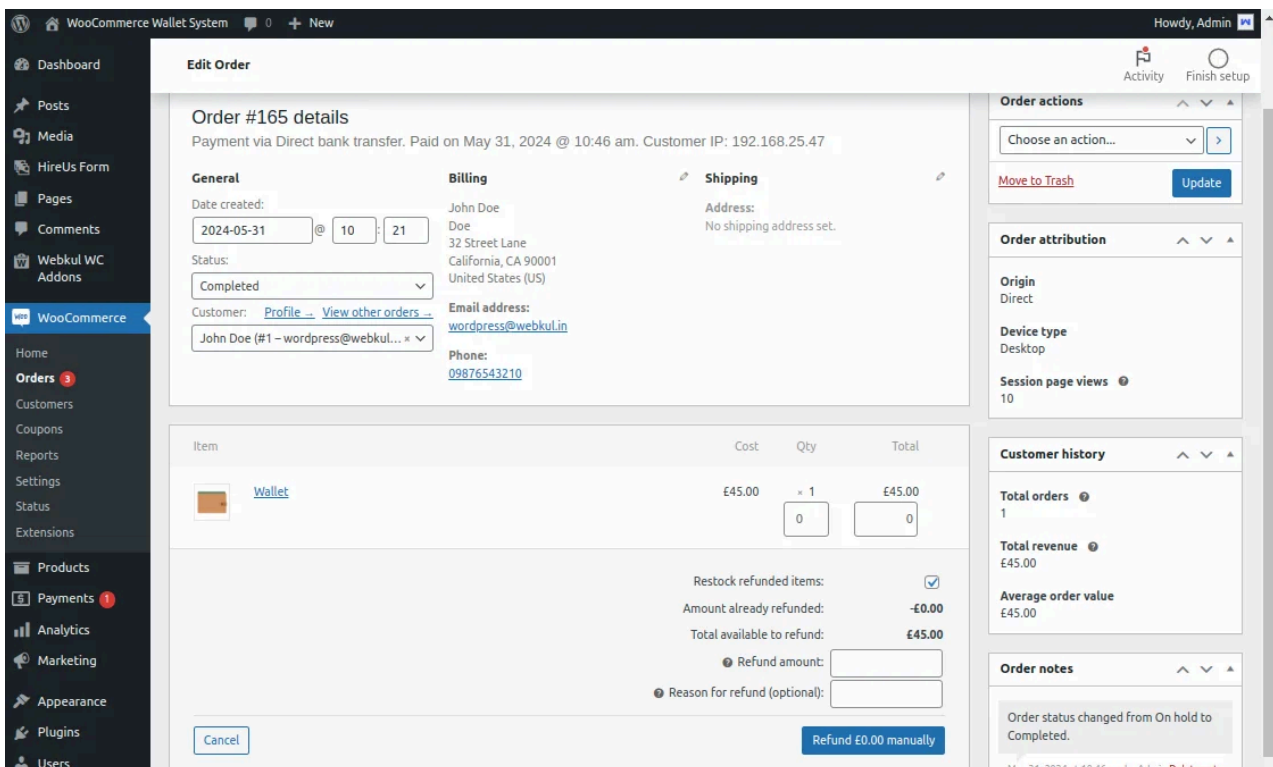

Refund Via Wallet

The admin can also set the refund amount for the orders and the payment can make through the wallet. For this admin has to navigate through **WooCommerce->Orders** and then click on the view option.

On clicking the **Refund** option, the admin can enter the Refund amount and click on Refund via Wallet.

That's all for the **WordPress WooCommerce Wallet System Plugin**.

Support

For any technical assistance please raise a ticket or reach us by email at support@webkul.com. Thanks for Your Time! Have a Good Day!

Also, discover various solutions to add more features and enhance your online store by visiting the WooCommerce plugins.
