Airtech WordPress Theme Documentation

This is documentation for airtech WordPress theme.

I would like to thank you first for buying the theme.

This theme is developed by [Bolvo.com](https://bolvo.com)

Lets get started...

Introduction

Steps to get help

1. Please check for the solution in appropriate page on This document, if not found please check on FAQ page on bottom of this page.
2. Please check online version of this document [here](#), there are chances I have updated it after you downloaded the theme.
3. Please browse/search here for more how-to: <https://kb.bolvo.com/> (There is not much content for now, but it will be added in future.)
4. Create ticket <https://bolvo.com/support/> (Do not forget to provide your themeforest purchase key for speedy reply.)

Thanks so much in advance for cooperation!

Best Practice to customize theme

Few style changes: If you only want to do few style changes, I suggest you to use Custom Css box in Appearance / Customise / Additional CSS. (this will override all other styles and it saves in database so it stays even if you update the theme)

Heavy style modifications: If you want to do heavy style modifications, I suggest you to use child theme instead. A blank simple child theme is supplied with your download in Resources folder. Just put your styles in style.css file of child theme.

Heavy customization: In case you are a developer and want to do heavy customization, again I suggest you use child theme. You can read more about child theme, here https://codex.wordpress.org/Child_Themes (Blank child theme is supplied with your Themeforest All Files Download.)

Installation

I assume you already know how to install WordPress, many Web-hosts provide 1-Click interface to install one of the Most popular CMS today, WordPress!

For detailed WordPress installation instructions visit http://codex.wordpress.org/Installing_WordPress

Check out this Youtube video for Demo site installation <https://youtu.be/BMEH2hHpfmk> (This video might be for other theme, but the installation process is exactly same)

Uploading Airtech Theme

Before moving to installation, we first need to upload theme to WordPress. (Assuming you are logged into wp-admin already at this point). Here is what to do next...

- Download theme from Themeforest. Please download All **Files and Documentation** and Not *Installable WordPress files only*.
- Unzip that folder on your local PC/Mac
- Inside that folder, you will find a zip airtech.zip around 200KB - 5MB of size. (this is the WordPress theme)
- Go to your wp-admin dashboard, then go to Appearance -> Themes -> Add new, and upload airtech.zip, and then activate the theme.
- Immediately skip to below section please.

Installing Airtech Theme

The theme comes with 1-Click installer and demo setup, you only need to follow below simple instructions.

- As soon as you activate the theme, you will be forwarded to install few plugins, please install theme, and then activate them. (refer image 1 below)
 - Click on Dashboard link on Left bar, on the top. (We do this to trigger the plugins we just activated)
 - Go to Theme Options > Welcome (If you dont see this link, all required plugins are not activated yet then.) (refer image 3 below)
 - Follow easy on-screen instructions.
-

- Thats it !

Note: If for some reason, menus does not get assigned automatically, please go to wp-admin/Appearance->Menus to assign menu. (refer image 4 below)

The above process is automatic and thus is technical. There are chances things might go wrong depending on your server's technical settings. Feel free to [contact us](#) if you have any trouble.

Now you should have Theme installed and setup just like demo. Now lets see how to edit things to match theme to your business.

Please also check FAQ section below for more answers.

Image 1 (referred above)

The screenshot shows the WordPress dashboard with the 'Appearance' menu highlighted. A notification at the top says 'Thanks for Activating Plumberx WordPress theme.' Below it, a message states: 'Theme requires few bundled plugins to function on its full power. Please Instal You can ofcourse choose not to install any particular plugin if you do not need If you do not see any plugin listed below that means all required plugins are ac menu to import demo content.'

Below the notification, a message says: 'As soon as you update the theme, you will be forwarded to this page.' Underneath, there are filters: 'All (6) | Update Available (1) | To Activate (5)'. A 'Bulk Actions' dropdown menu is open, showing options: 'Bulk Actions', 'Install', 'Update', and 'Activate'. An 'Apply' button is next to it.

The main content area shows a table of plugins with the following data:

| | Source |
|--|----------------------|
| <input type="checkbox"/> Demo Content | External Source |
| <input type="checkbox"/> Plumberx Essentials | External Source |
| <input type="checkbox"/> Visual Composer | External Source |
| <input type="checkbox"/> Contact Form 7 | WordPress Repository |

Annotations with arrows point to specific elements:

- 'Step 1 : Select all plugins' points to the checkboxes in the plugin list.
- 'Step 2: Install all plugins' points to the 'Install' option in the Bulk Actions dropdown.
- 'Step 3: Activate all plugins' points to the 'Activate' option in the Bulk Actions dropdown.

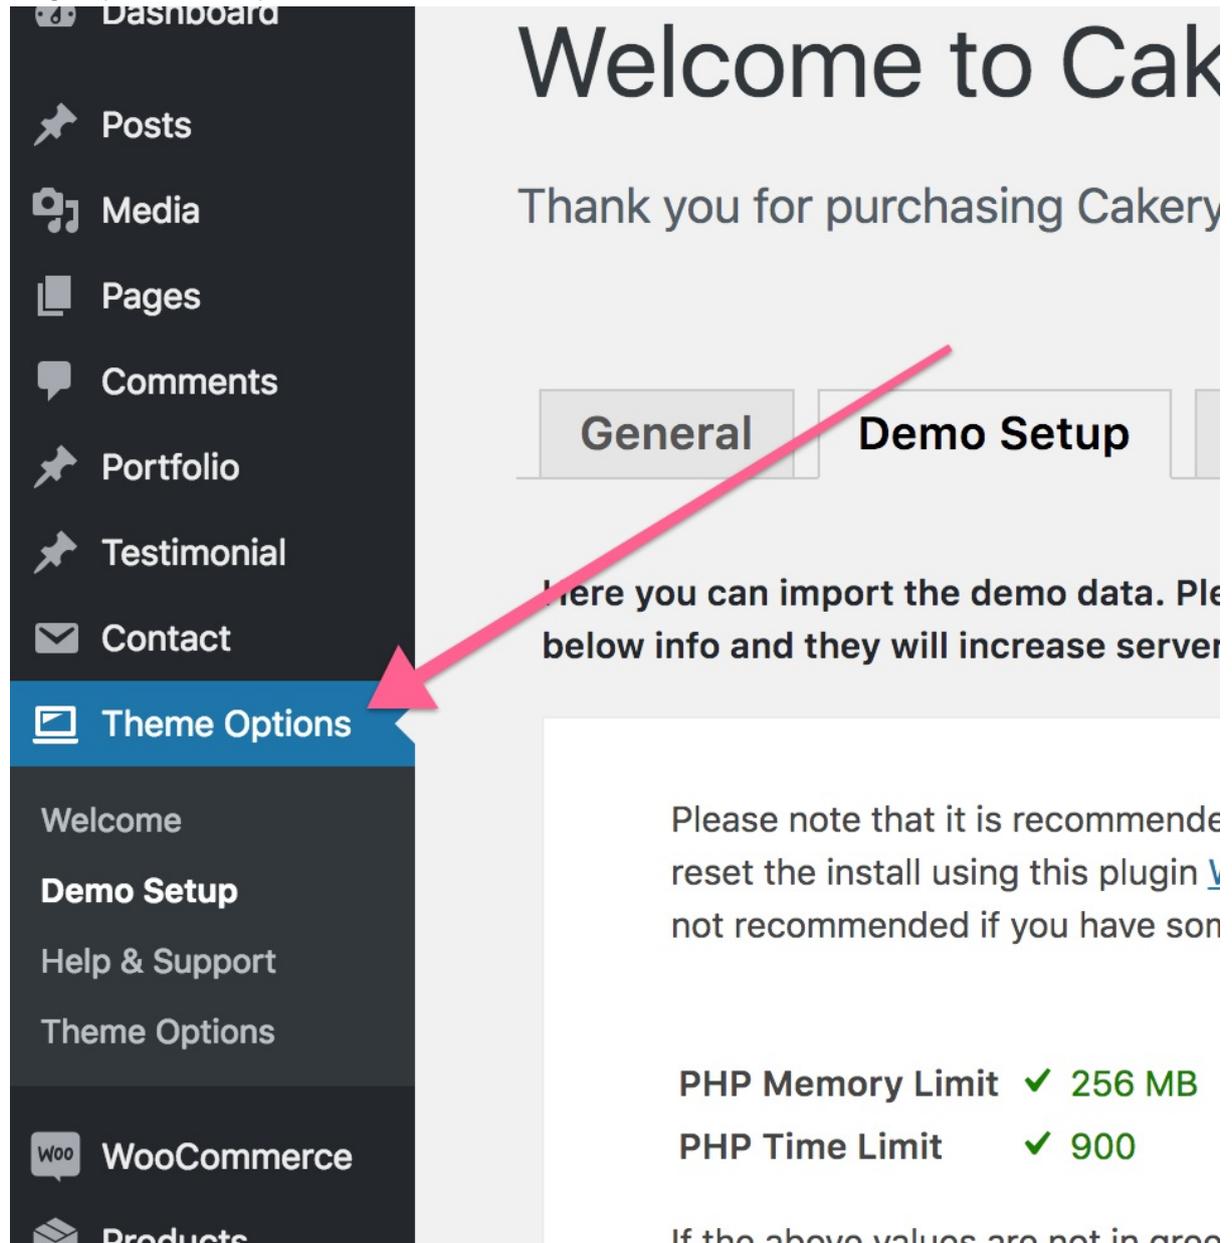

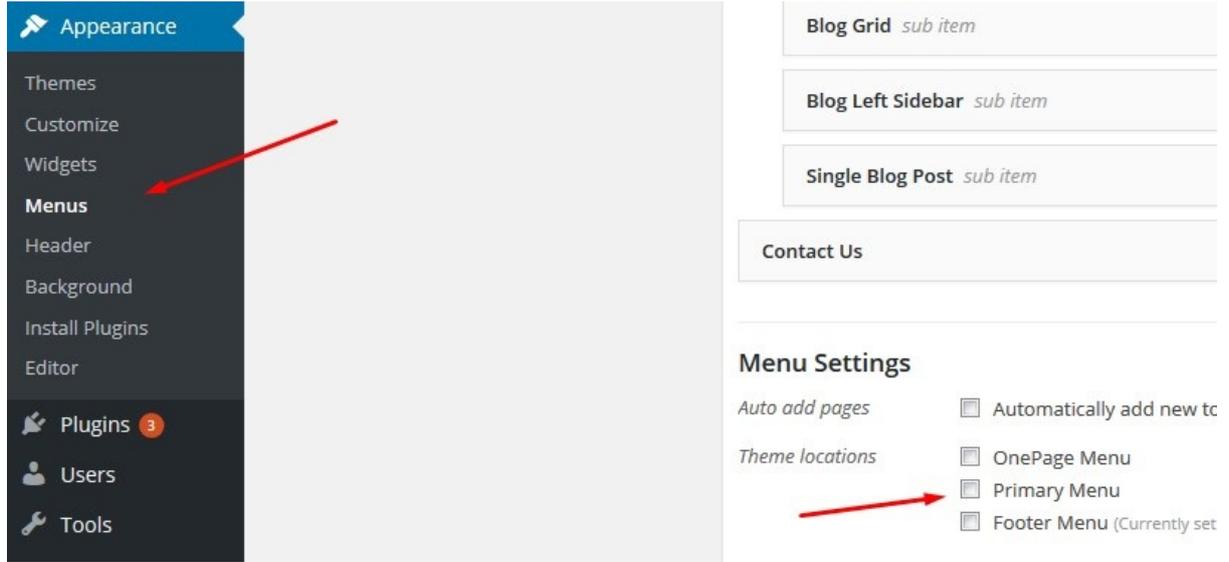

Image 4 (referred above)

Page Builder

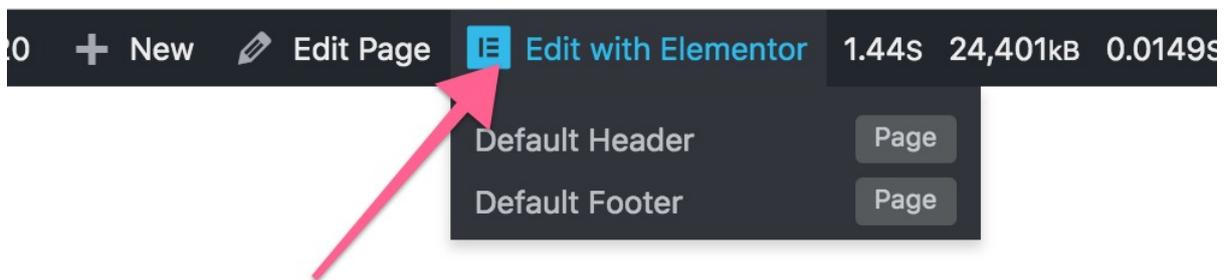

This theme is created with Popular Elementor Page Builder. Theme comes with over 50 custom modules as well. Its easy and fun to customise the website to your requirements.

Find out more about that plugin here <https://elementor.com/>

Here is quick start guide...

- To create/edit a page.. Log in as admin and Go to Pages (add new or edit) and then click Edit with Elementor. Or you can also click Edit with Elementor from Top admin bar from front page if you are logged in as admin.(as shown below)

One Page Love  Introducing Item S...  Screenfly by Quirk...  0to255 

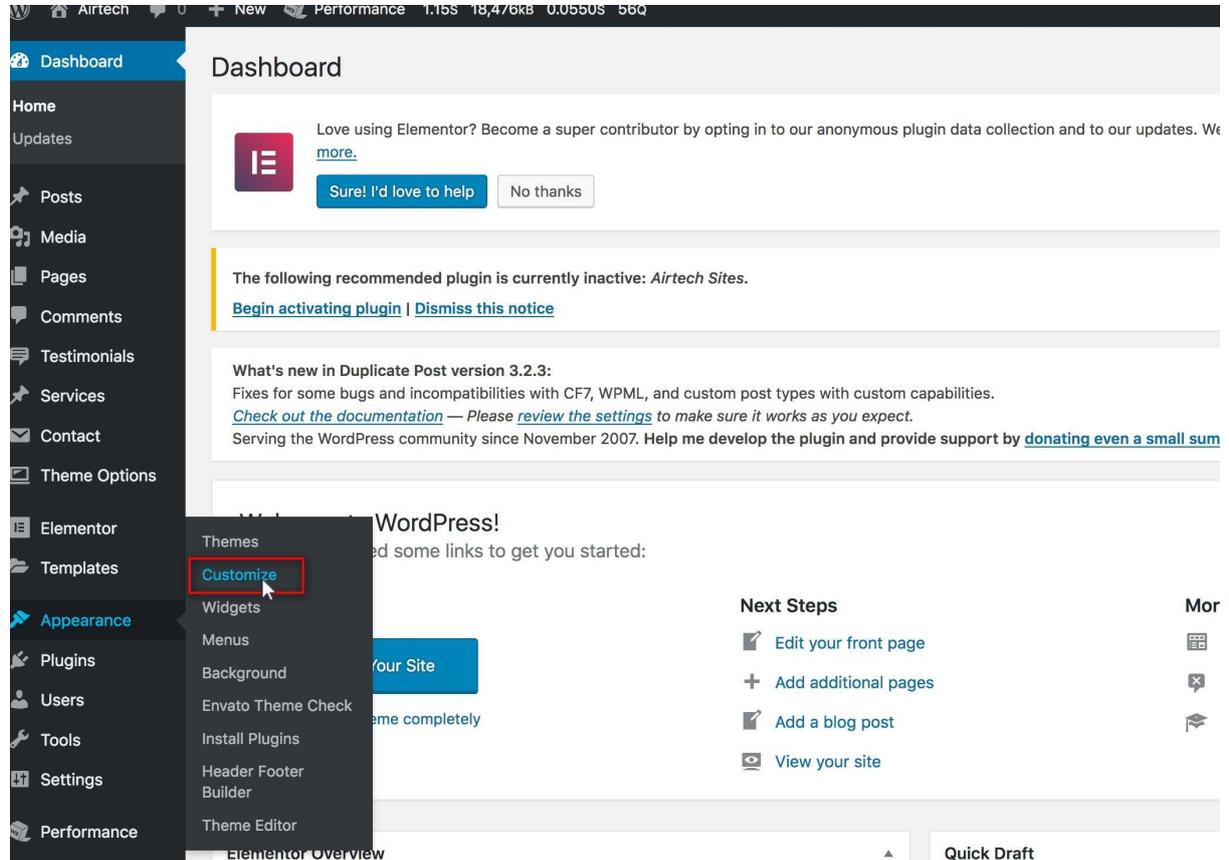

Note: If you need, Documentation for the plugin can be found here <https://elementor.com/support/>

Main Setup

Please follow the instructions ahead for the basic setups of the theme.

Header

To customise the default header, please go to Default customiser of WordPress. There you will find options to change header stuff. For example, here are the steps to change the logo.

Header / Logo

You are customizing Airtech

Active theme: Airtech

- Airtech General Settings
- Airtech Header**
- Airtech Content Settings
- Airtech Footer Settings
- Site Identity
- Body Background
- Menus
- Widgets
- Homepage Settings
- Additional CSS

Airtech Heating & Air Conditioning

Customizing • Airtech Header
Logo

Use Logo. If disabled, the Site Title entered in Site Identity will appear instead.

Enable

Upload Logo

No image selected

Select image

If you want high resolution logo, please upload double size logo and then select 50 here. Then the logo will be resized to its 50% width.

88

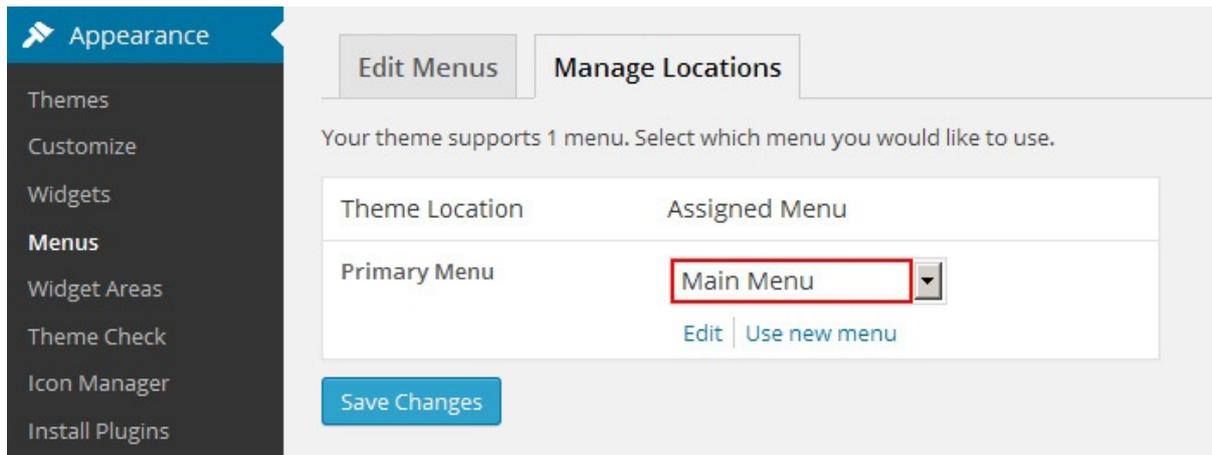

The image shows a website header and hero section for Airtech Heating & Air Conditioning. The header is dark blue with the Airtech logo (a technician in a hard hat) and the text "Airtech Heating & Air Conditioning". To the right is a "SCHEDULE AN APPOINTMENT" button with a calendar icon. Below the header is a blue navigation bar with links: HOME, ABOUT US, SERVICES, RESOURCES, BLOG, GALLERY, and CONTACT US. The main hero section features a large image of a smiling technician in a tan uniform standing next to a blue and white pickup truck. The text "Satisfaction GUARANTEED" is prominently displayed, followed by "If you need emergency repairs please call 1800 456 7890" and a red "CONTACT US" button.

Menu

If importing went successful, you will see menu already. To Setup menu as per your need, please go through these steps:

1. Go to Appearance > Menus. You can edit or create your own menu and assign items to it.

If you are totally new to WordPress, there are plenty of videos of Youtube you can refer to know more about WordPress menus.

The screenshot shows the WordPress 'Appearance > Menus' interface. On the left is a sidebar with 'Appearance' selected and 'Menus' highlighted. The main content area has two tabs: 'Edit Menus' and 'Manage Locations', with 'Manage Locations' being the active tab. Below the tabs, a message states: 'Your theme supports 1 menu. Select which menu you would like to use.' A table with two columns, 'Theme Location' and 'Assigned Menu', is displayed. The first row shows 'Primary Menu' in the first column and 'Main Menu' in the second column, with a dropdown arrow next to 'Main Menu'. A red rectangular box highlights the 'Main Menu' dropdown. Below the table, there are two links: 'Edit' and 'Use new menu'. At the bottom left of the main content area is a blue 'Save Changes' button.

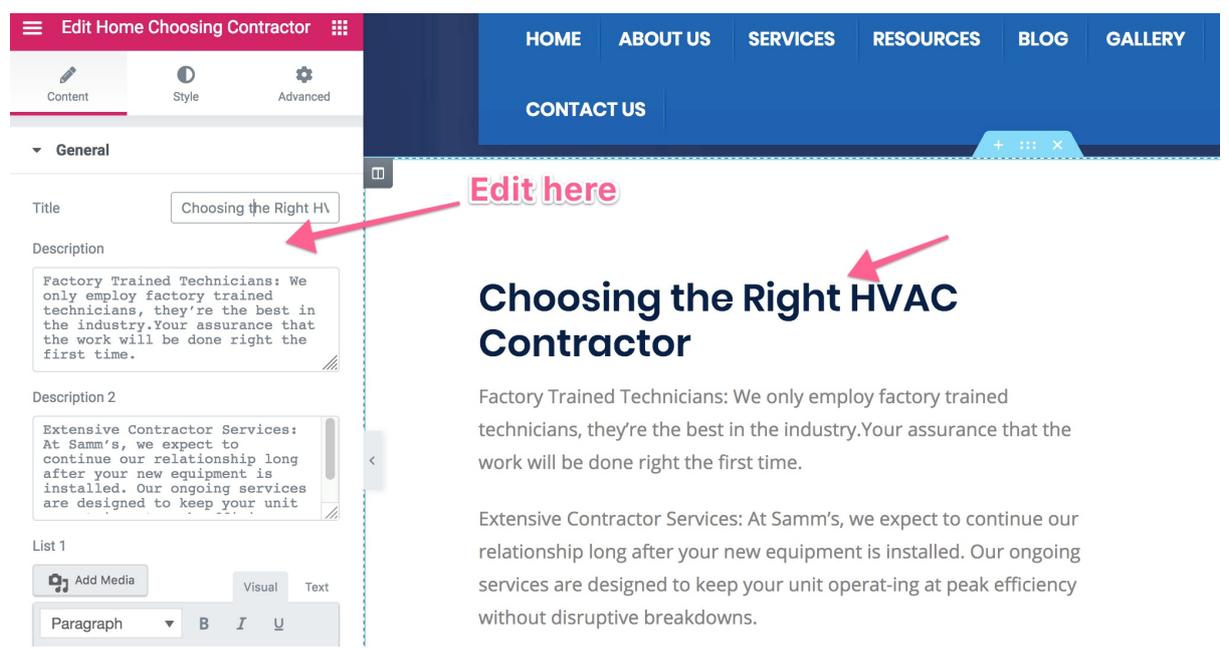

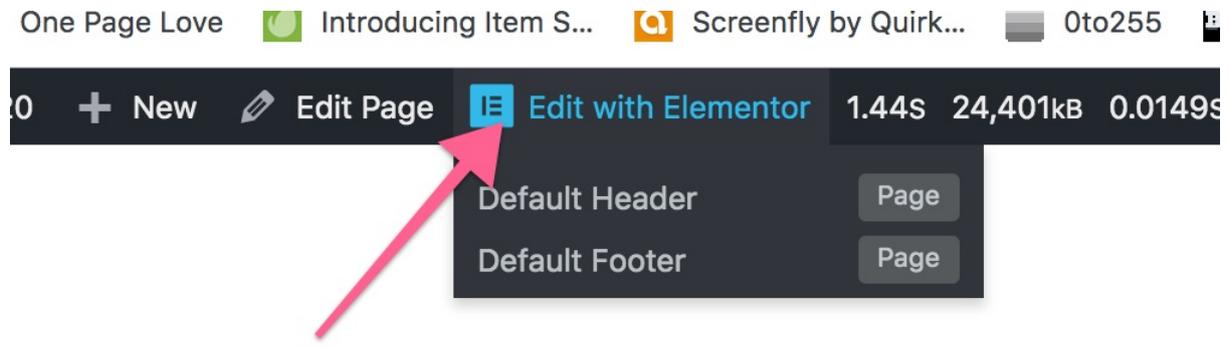

| Theme Location | Assigned Menu |
|----------------|---------------|
| Primary Menu | Main Menu |

If you need help, please contact [support](#) .

Pages

All pages are created with Elementor Page builder. So editing is as easy as point and click.

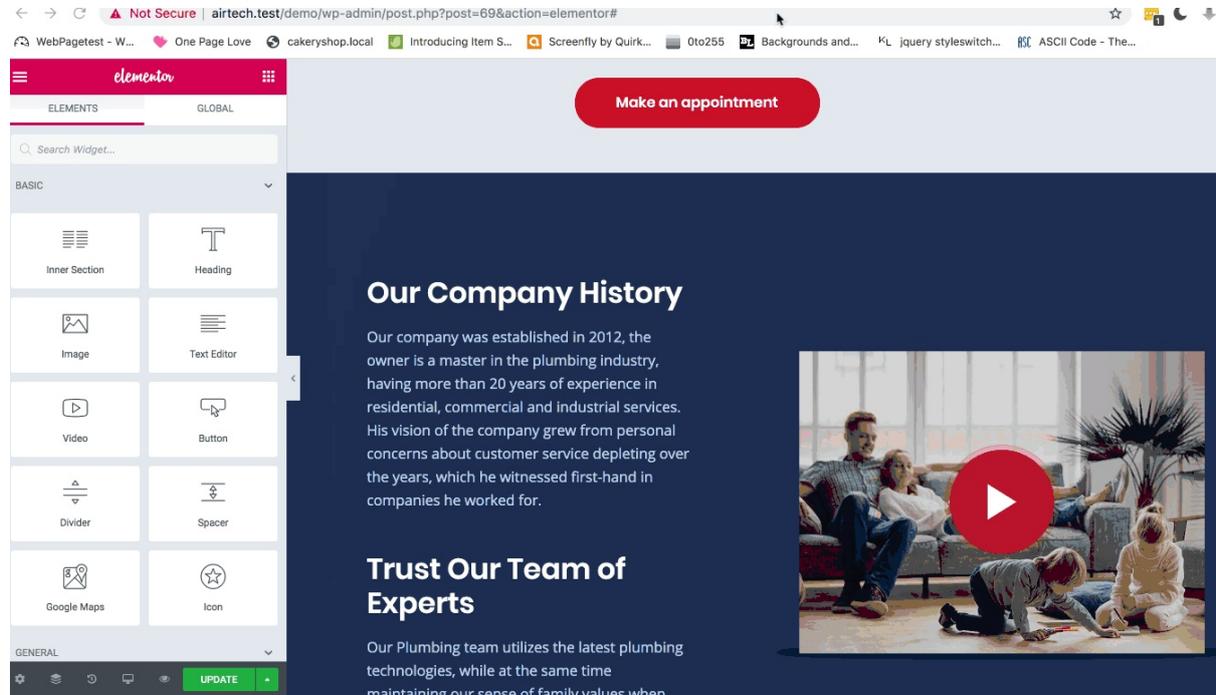

You can edit page from wp-admin/pages or you can also Edit any page directly from Front end by clicking Edit with Elementor menu on the Top.

Once you click the Edit button, the Elementor edit panel will load and you can point and click any element on page to see edit options on the left side. You can also edit some text by just clicking and start typing.

If you need help, there is very large community for Elementor so Google your Youtube can help alot. After less than 1 hour of learning curve you will start enjoying the Elementor a lot!

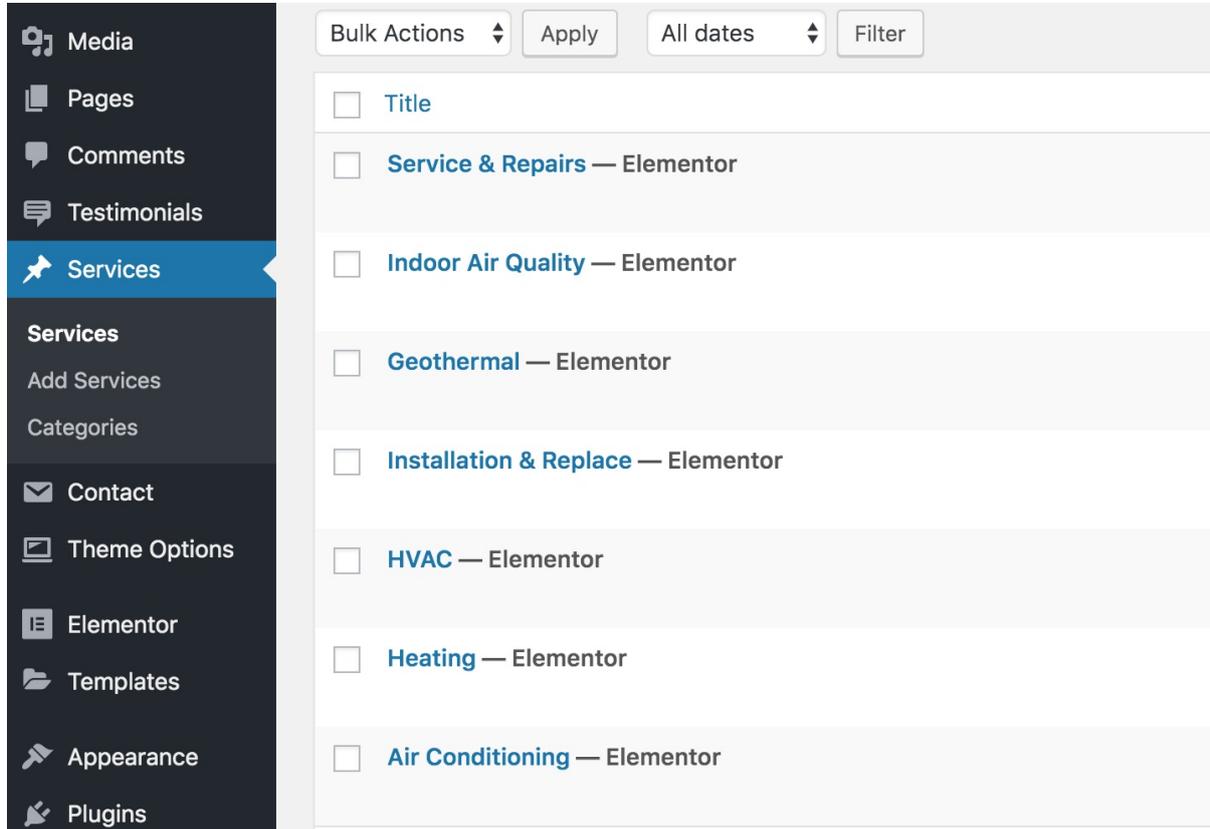

Elementor provides so much flexibility, here is an example GIF, a customer wanted to use his own image of different size in one of the block, here is how to achieve the same.

Services / Gallery setup

The services page can be managed using Elementor page builder.

There is a separate post type for Services, as shown below.

The screenshot shows the WordPress admin interface for the Services post type. On the left is a dark sidebar with navigation options: Media, Pages, Comments, Testimonials, Services (highlighted), Services (sub-menu), Add Services, Categories, Contact, Theme Options, Elementor, Templates, Appearance, and Plugins. The main content area displays a list of Services with a bulk actions bar at the top containing 'Bulk Actions', 'Apply', 'All dates', and 'Filter'. The list items are:

- Title
- [Service & Repairs](#) — Elementor
- [Indoor Air Quality](#) — Elementor
- [Geothermal](#) — Elementor
- [Installation & Replace](#) — Elementor
- [HVAC](#) — Elementor
- [Heating](#) — Elementor
- [Air Conditioning](#) — Elementor

You can edit these using Elementor to edit the content of the Service pages.

One more important thing is that the Gallery items shown on Gallery page are also associated with Services. To manage those images, please edit the Services in wp-admin traditionally as shown below.

The screenshot shows the WordPress admin interface for the 'Services' section. On the left is a dark sidebar with navigation options: Posts, Media, Pages, Comments, Testimonials, Services (highlighted), Add Services, Categories, Contact, and Theme Options. The main content area shows a list of services under the 'Published (7)' filter. At the top of the list are controls for 'Bulk Actions', 'Apply', 'All dates', and 'Filter'. The list items are: 'Title', 'Service & Repairs — Elementor', 'Indoor Air Quality — Elementor', 'Geothermal — Elementor', 'Installation & Replace — Elementor', and 'HVAC — Elementor'. Each item has a checkbox on the left. Below the 'Service & Repairs' title are links for 'Edit', 'Quick Edit', 'Trash', 'View', and 'Edit with Elementor'. A red arrow points to the 'Edit' link.

and then change featured images here.

nce/Customise and override
lect Yes here.

ou want.

Title displayed in it, if so

Default Template ▼

Featured Image ▲

Click the image to edit or update

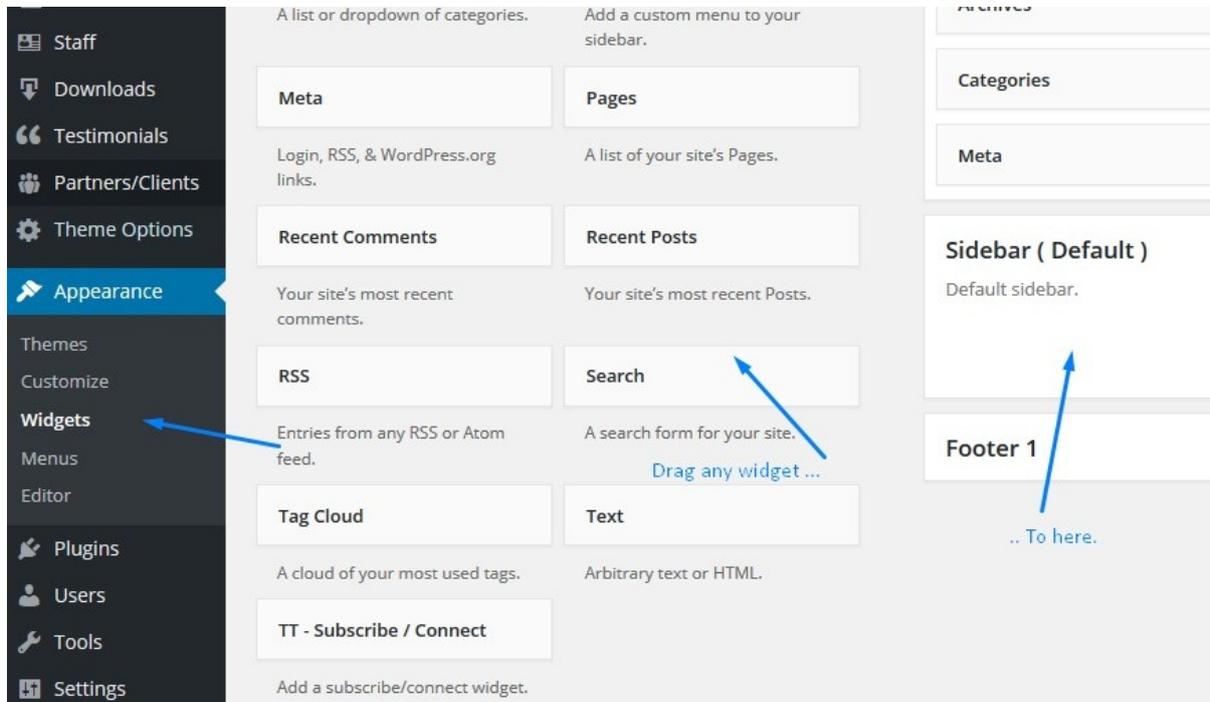

[Remove featured image](#)

If you want normal Gallery instead, You can opt to use Gallery module available in Elementor Page builder.

Sidebar & Widgets Management.

In this theme, you can choose to have sidebar.

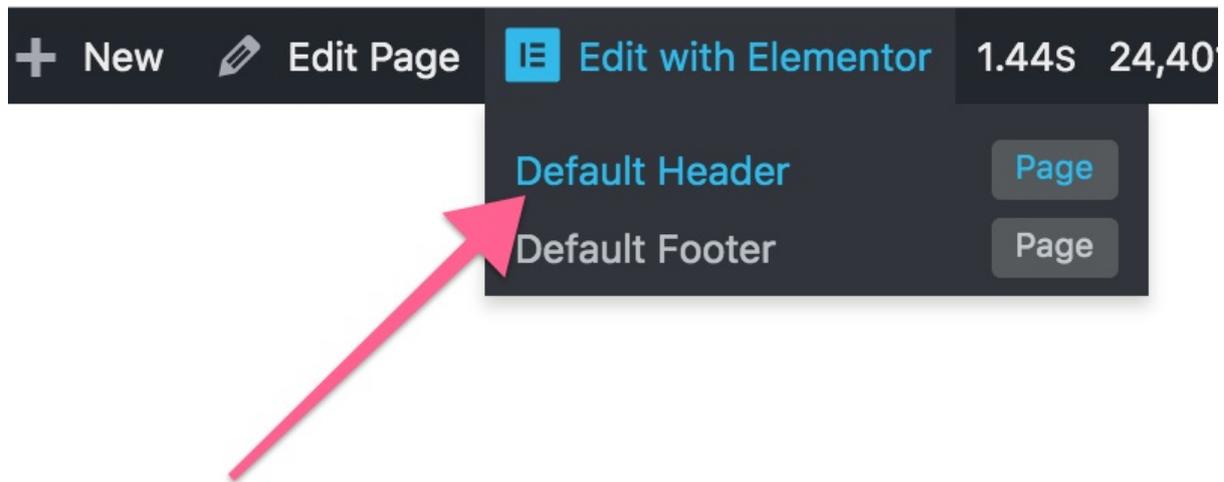

To put Widgets in sidebar, please go to Appearance / Widgets and drag Widgets of your choice to Default Sidebar Widget area.

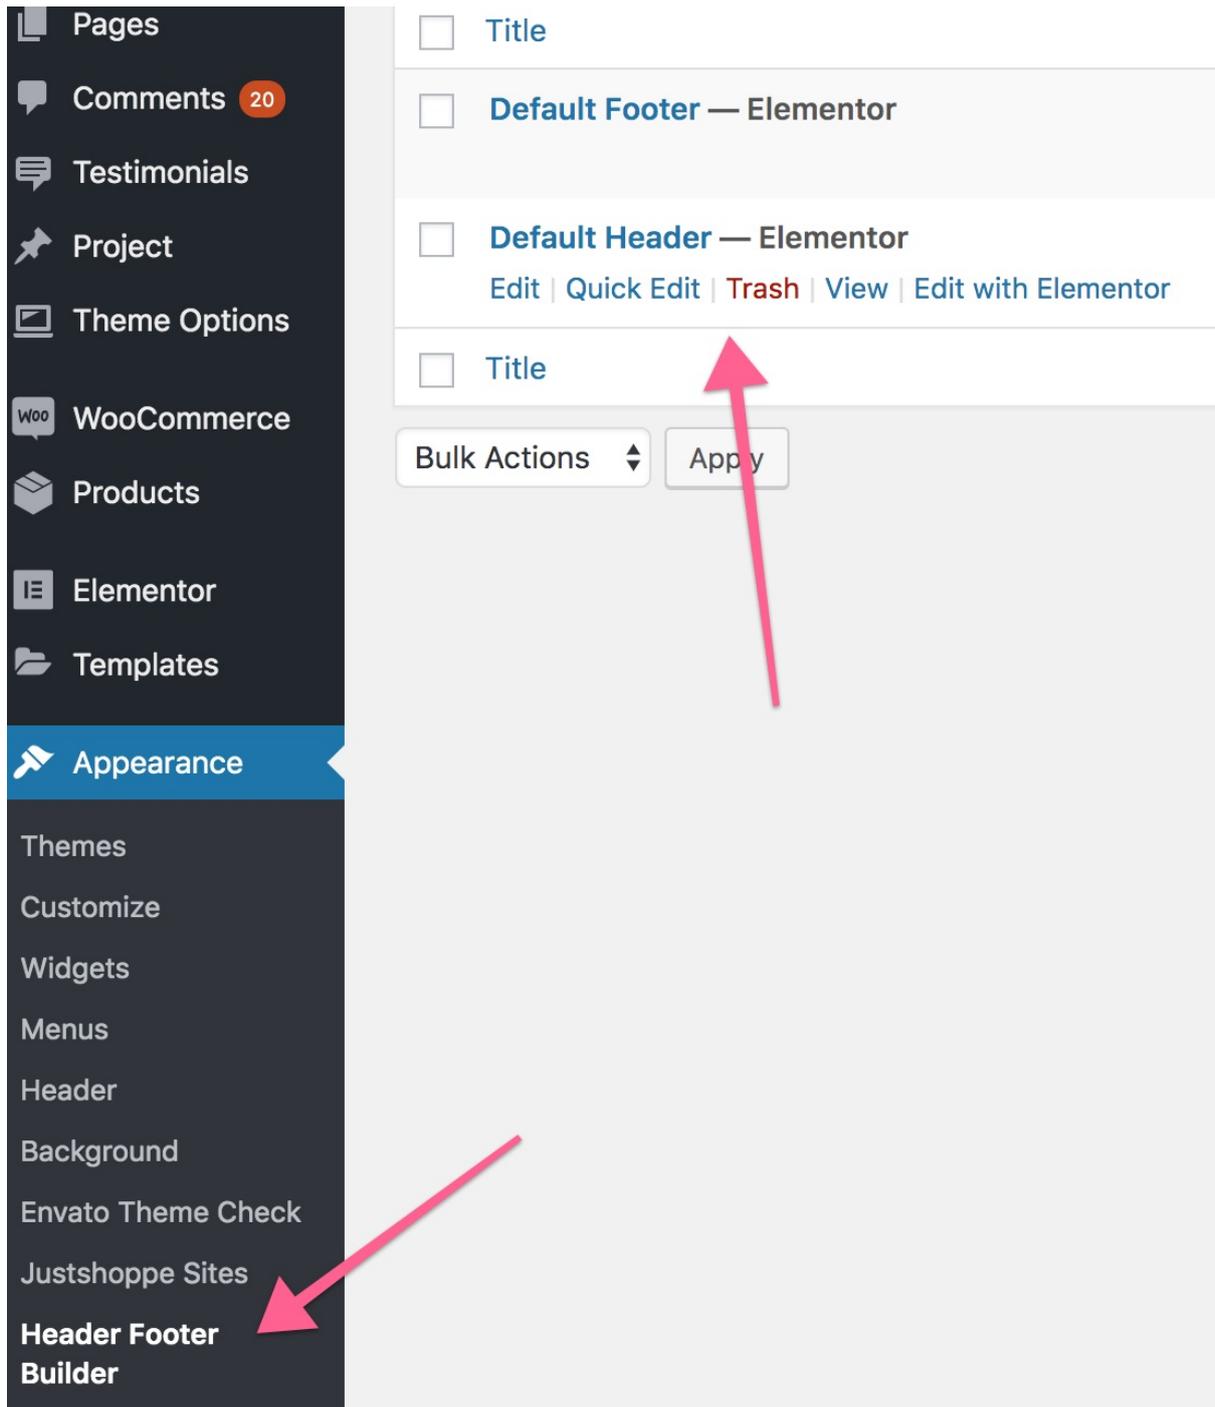

Footer

Just like Header, the footer is also powered by Elementor in this theme.

You can edit footer as easily as clicking the menu Edit with Elementor > Default footer from any page.

Or you can also edit from Admin panel.

After you click Edit button, you will see Elementor panel to edit the footer content.

The screenshot displays the Elementor editor interface for editing the 'Airtech Footer CTA' widget. On the left, the 'General' tab is active, showing the following configuration options:

- Image:** A cartoon illustration of a technician in a blue shirt and brown gloves holding a wrench.
- Image Alt Text:** An empty text input field.
- Line 1:** A text area containing the text: "Free Estimates on Complete System Replacement".
- Line 2:** A text area containing the text: "Call Now 1800 456 7890".
- Buttons:** A red 'Content' button, a 'Style' button, and an 'Advanced' button are visible at the top of the sidebar.
- Footer Preview:** The right side shows a dark blue footer with a white dashed line. It features the technician image, the text "Free Estimate Replacement", "Call Now 1800 456 7890", a "Contact Us" section with address and phone details, and a "Quick Links" section with links to Home, Special, About Us, Our Blog, Testimonials, and Contact Us. A copyright notice "Copyright © Airtech 2019. All right reserved." is at the bottom.

You have choice to display default, 1, 2, 3, 4 columns in footer widgets.

Note : If you do not want to use Elementor Powered Footer, you can disable the Default Footer by going to appearance/customize/Airtech Footer

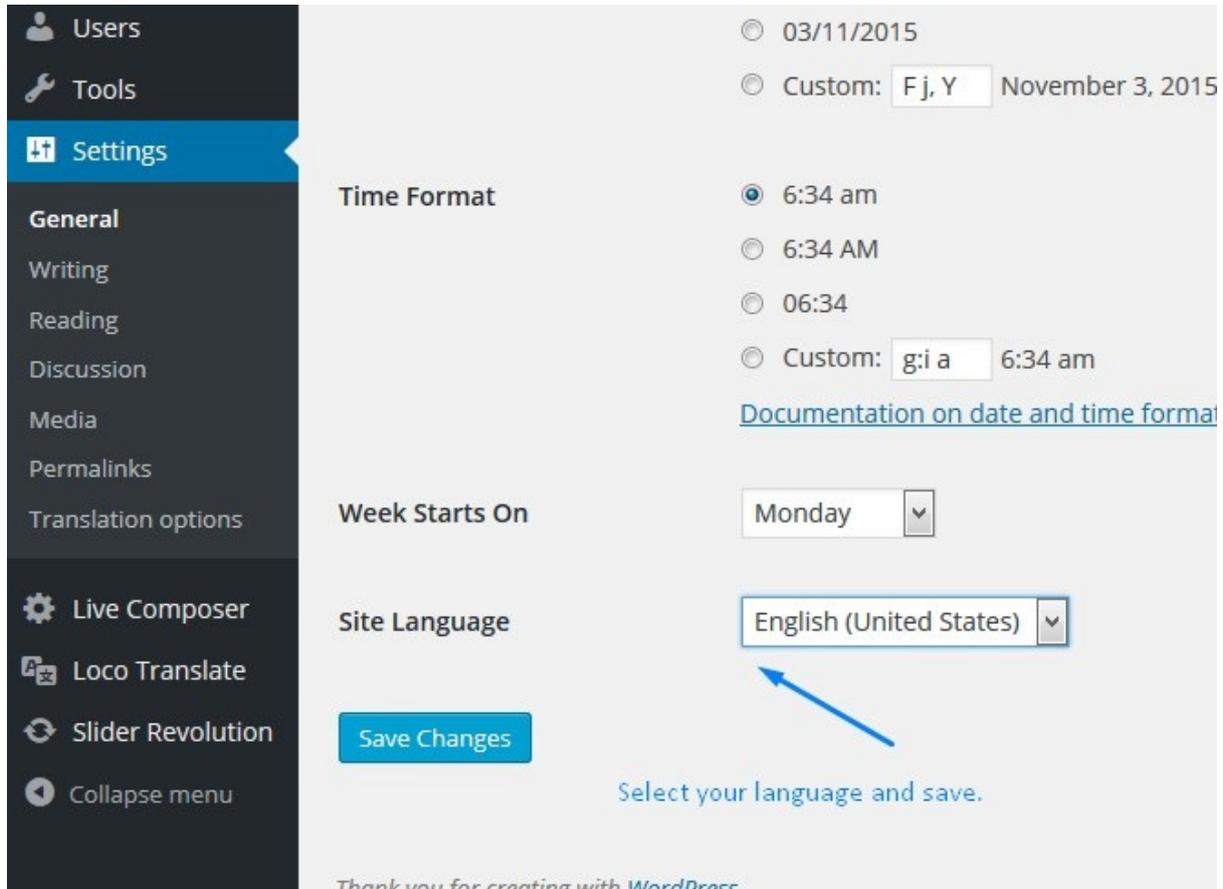

Now you can use the default Footer columns found in Appearance/Widgets to put widgets in footer. The columns on the footer will auto adjust based on the widgets you drag in Footer Columns sidebar. For example, if you drag widgets to only Footer columns 1 and 2 sidebar, only 2 columns will appear in the footer.

Translation

The theme is translation ready and its very easy to translate it in your desired language.

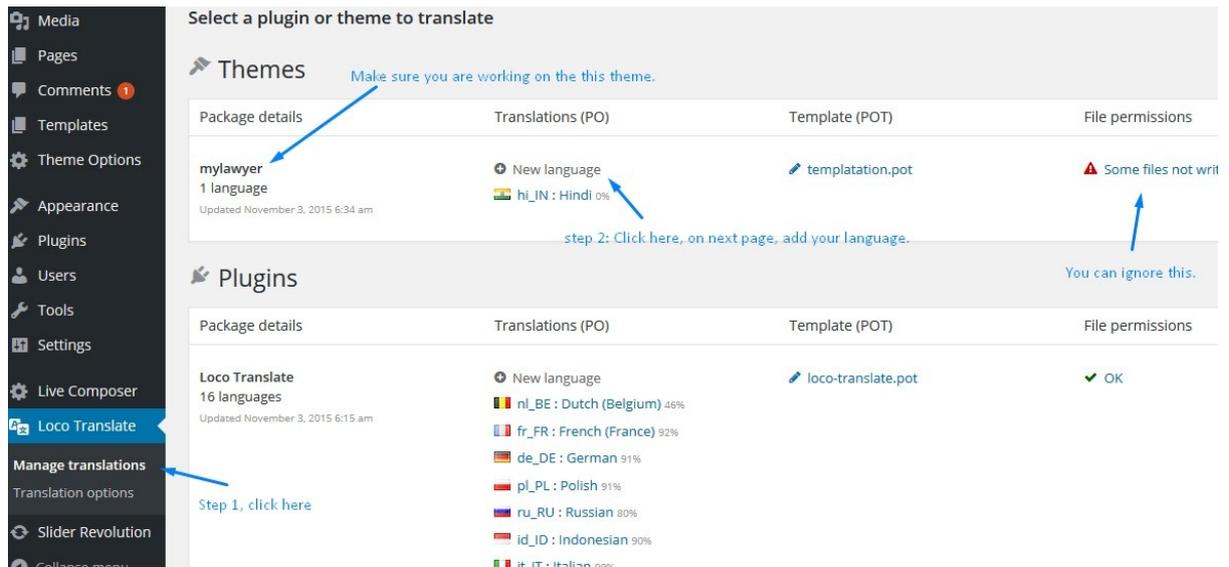

Here are the steps.

1) Go to wp-admin/settings/general/ and Select your language.

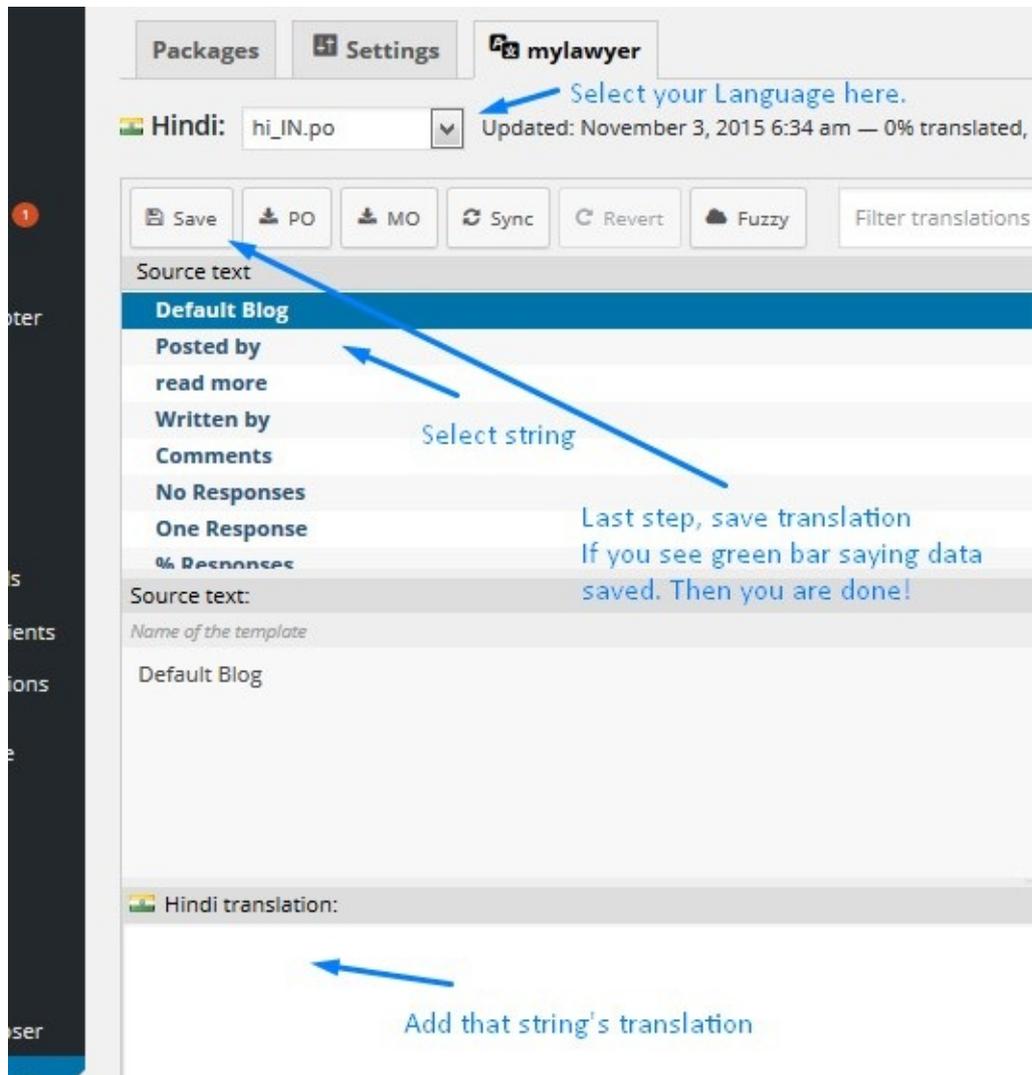

2) Install and activate this plugin <https://wordpress.org/plugins/loco-translate/> (I am assuming you know how to install plugins, if you do not, please Google it.)

3) Once plugin is activated, you will find a new menu on left. Please go to Loco Translate -> Manage translations, and click on New language link of airtech theme. (Please disregard theme name in following screenshot, it was built for another theme. You can still follow the same steps.)

4) On next page, select your language, and click Start translating, on next page you will see list of all available strings and a box to enter their translation.

Note that there are over 1000 strings, but you do not need to translate all of them, most of them are being used in Admin panel like in themeoptions etc and can be ignored as front user never see them.

So its recommended that you go through the front website and find and translate terms as needed. There should be under 100 strings that are required.

Once Saved in last step, if you do not see Green bar, and see some permission problems in saving data instead, then please contact your host about it, as its server file permission problem.

Theme Updates

Note : Its always recommended to backup your Website, Theme, Database before updating. You can use [this updraftplus plugin](#) to have regular backups of your Website.

Updating the theme is very easy.

You can go to Appearance / Themes and you will see a notification to update theme if you have entered a valid purchase code in Themeoptions/Welcome screen.

After updating the theme, just go to Appearance->plugins to update all plugins to their latest versions.

Frequently Asked Questions.

Question: Is there any online Knowledgebase ?

Answer: Yes, please find it at <https://bolvo.com> (There is not much content for now, but it will be added in future.)

Question: I have a question, how do I contact you ?

Answer: Feel free to contact anytime using <https://bolvo.com/support/> for any question, suggestion, feedback, or just saying Hi!

Question: I do not know how to install WordPress, what should I do.

Answer: There are number of tutorials online for installing Wordpress, you can also find Videos on Youtube for same. Apologies for inaccurate answer, but thats because its not part of Theme-support. Thanks for understanding in advance.
