THEME INSTALLATION

Once you've downloaded the installation file on ThemeForest, extract it and locate a file called **Hank.zip**. You can install the theme by using one of two installation methods:

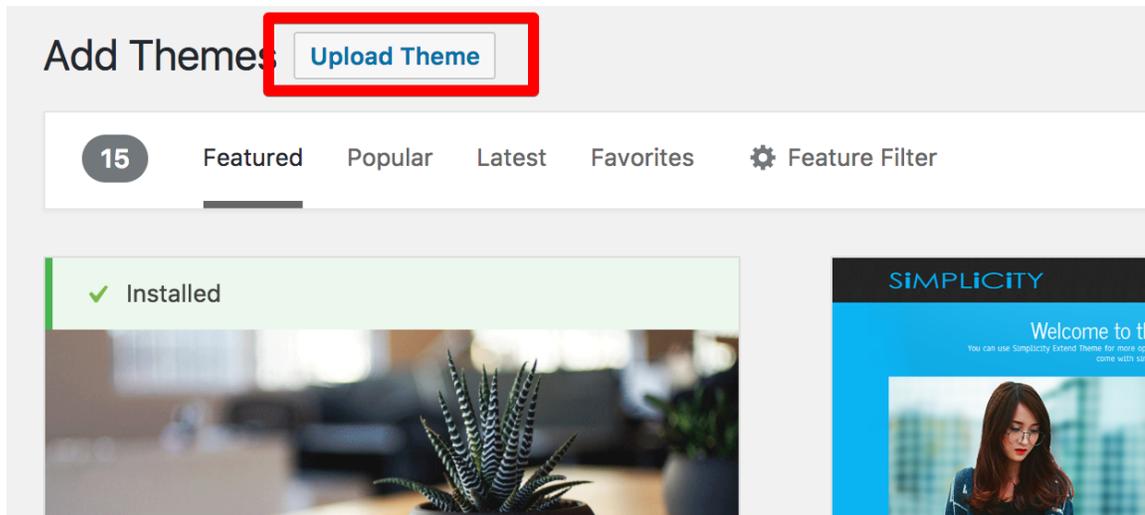

Install by WordPress Theme Manager

This is probably the simplest way for most users. Here are 6 steps you need to take:

1. Login to your Admin page.
2. Navigate to **Appearance > Themes**.
3. Click **Add New**

4. Then click **Upload Theme**

5. Next, browse to the zip file and click **Install now** so the theme can be uploaded and installed.
6. After done installing, click **Activate** to publish the theme

Install through FTP upload

If you want to install via FTP, here are 3 steps you need to take:

1. Using FTP client, login to the server where your WordPress website is hosted
2. Using FTP client, navigate to the **/wp-content/themes/** directory under your WordPress website's root directory
3. Using FTP client, upload the Royal directory to themes directory on remote server

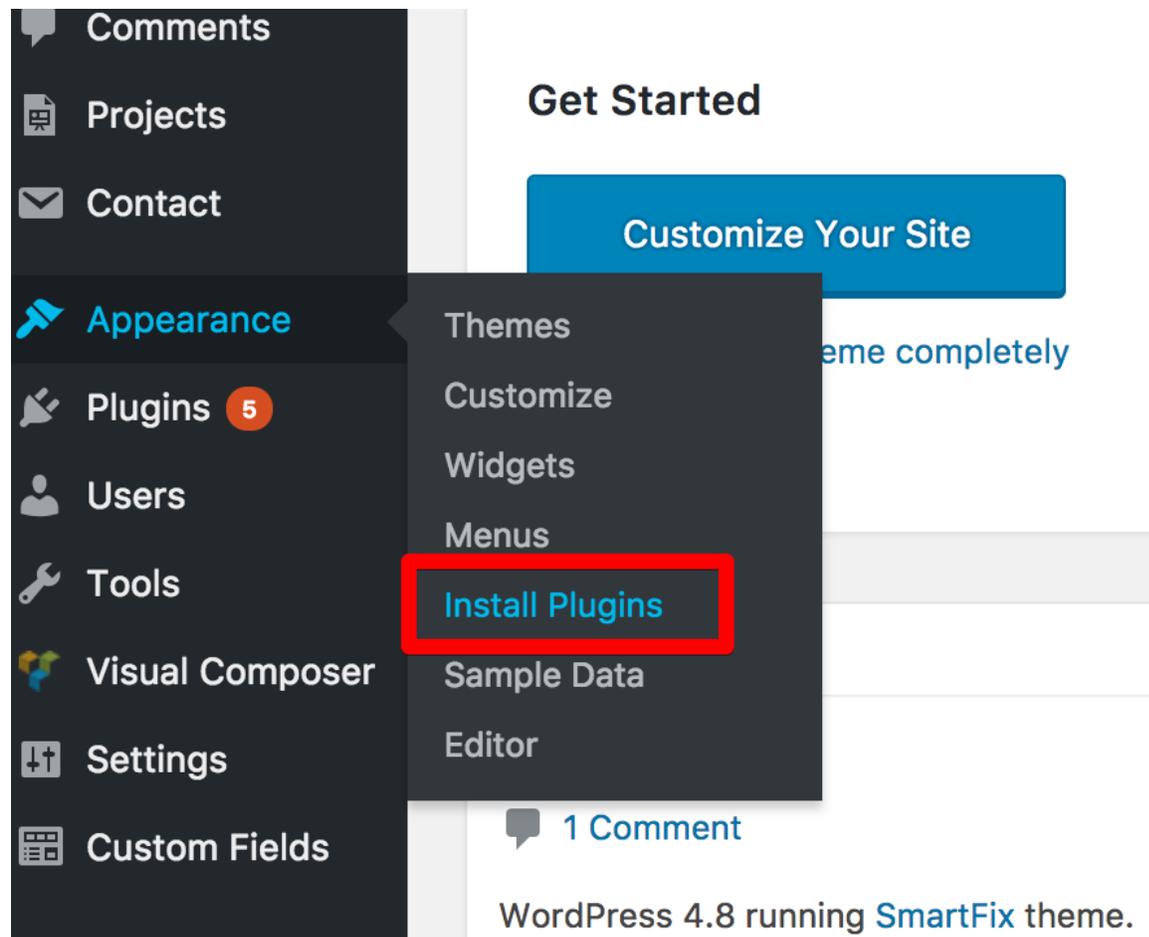

Once installation is complete, your Royal theme will be ready to use.

Install Plugins

After activating the theme, you will be asked to installed the required and recommended plugins, you can proceed by clicking on **Begin installing plugins**

In the next page, check all the plugins that you want to install then on the drop down **Bulk Actions**, choose **Install** then click **Apply**, the plugin installation process will start.

After install plugins, go to **Appearance > Install Plugins**.

Check all the plugins that you want to activate then on the drop down **Bulk Actions**, choose **Activate** and click **Apply**, the plugin activation process will start. Wait for all the plugin activated then you can start customizing your website as you want
